Canterbury	222	Halton	472		
Castle Point	227	Harborough	478		

Unforced errors crush Conservative post-pandemic chances

Not long before the start of the 2023 local elections campaign a furore was created by the publication of the so-called "Lockdown Files": a cache of former Health Secretary Matt Hancock's WhatsApp messages illuminating ministers' behaviour during the Covid pandemic.

The irony of this trove of insights is that the 2023 elections came two years after a set of council elections in which the Conservative Party excelled - due, according to some, to a "pandemic bounce" in which the electorate rewarded the party for its handling of lockdown and in particular the successful vaccination programme.

The Conservatives' travails in 2023 had less to do with the Lockdown Files and more to do with a range of events of the two years in between that great victory (they beat Labour in 2021 by ten points: 40% to 30%, according to the National Equivalent Vote - NEV - measure) and this great defeat.

The two years from the Conservatives' 2021 peak should be viewed as a piece, with the 2022 local elections little more than a staging post along the way. They are the story of the self-immolation of Boris Johnson's premiership and the devastation wrought on the party in its aftermath.

Britain breaks with Boris: autumn 2021

The party maintained a lead over Labour from May until the late autumn of 2021 when the spectacular mishandling of the Owen Paterson affair kick-started a rapid slide.

The former Minister for Agriculture had been found by a committee of his peers to have lobbied on behalf of a company within his constituency for which he was being paid. On the presentation of the Standards Committee's report to the House of Commons, the government whipped Tory MPs to reject its findings, then promptly U-turned, beaching those MPs who had sustained reputational damage by obeying the whip, and abandoning Paterson, who promptly resigned from parliament.

The British economy was also experiencing extraordinary pressures as the world re-awakened following lockdown, re-expanding at a record pace but also absorbing huge inflationary stresses from labour shortages and lack of capacity in long shut-down supply chains.

In November Partygate hit the papers: the revelations that, while the government was imposing cruel and unusual prohibitions on British families from seeing loved ones, Downing Street was partying - with the Prime Minister, Boris Johnson, and Chancellor, Rishi Sunak, both receiving lockdown fines from the Metropolitan Police after extensive investigation.

The pollsters Redfield and Wilton reported a Labour opinion poll lead on 8th December 2021 of four points over the Conservatives (38% to 34%). No opinion poll - from any pollster - since that date has given the Conservative Party the lead. Today the Conservatives would give their eye-teeth to be only four percentage points behind Labour.

Ukraine and the surge in energy costs

Partygate was the first fracture between the Conservative Party and the coalition Boris Johnson had assembled to produce their near-landslide general election victory. Offsetting the mistakes - but only slightly - was Johnson's leadership when Russia invaded Ukraine.

Whatever his motives for standing steadfast with Ukraine he is too much a politician not to have hoped that this conflict would be his Falkland Islands - the 1982 clash with Argentina that cemented Margaret Thatcher's image as one of Britain's stronger premiers, and was in no small part the reason for her 1983 general election landslide. But Johnson was to discover the hard way that foreign policy rarely swings votes, especially as this conflict turbo-charged inflation and made energy unbearably expensive for Britons. While the majority supported Britain's position on Ukraine, patriotism does not keep the heat on.

Ordinarily, Chancellor Rishi Sunak's pledge to give every single UK household at least £400, and up to £1,200 for the poorest, to meet energy costs, would be rewarded by the electorate. But that Partygate rupture between the government and its voters ran deep and, with ongoing - almost daily - new revelations about that and other Conservative scandals, the Conservatives did not receive any poll boost. And the massive interventions the government was compelled to make to keep energy remotely affordable for the masses was to have a massive medium term impact for the Conservatives.

The 2022 local elections

This was the context in the run-up to the 2022 council elections. Labour was, by now, around eight points ahead of the Conservatives but they only managed to eke out a three point win in the local elections, despite these being their most favourable round of councils up for election: London, the metropolitan districts including Birmingham, plus Wales and Scotland.

In part because the media is based in - and somewhat obsessed by - London, and because of the order results happened to be declared, these elections were reported as a major Labour success. The party gained the flagship Conservative boroughs of Barnet, Wandsworth and Westminster: all early declarers. But by the following Monday Labour had lost Croydon, Harrow and Tower Hamlets - all announced long after the headlines of election night were written.

In fact the 2022 results were far more nuanced. Even in London where the Conservatives were hammered in marginal and safe Tory wards, there were big swings against Labour in their safe, ethnically diverse wards, especially in north and west London. Labour continued to struggle in several so-called red wall districts, and they lost Hull to the Lib Dems. These could certainly not be regarded as a great set of results for the Conservatives but they were almost as unimpressive for Labour given they were mid-term elections.

The no confidence vote

Whether the local elections were the sole trigger, or the seemingly unceasing run of Partygate stories was an added impetus, by early June more than enough letters of no confidence in Boris Johnson had been submitted to the parliamentary party's backbench 1922 Committee to trigger a vote on his leadership. The submission of letters was in itself a faint farce with MPs agonising over whether it was appropriate and self-indulgent to hold a leadership vote during a "war" (curiously forgetting that Winston Churchill replaced Neville Chamberlain during a war); some of them withdrawing letters they had earlier submitted. Still, the number required was exceeded and a vote held on 6th June.

Conservative leadership elections as far back as Margaret Thatcher's are bizarre affairs because, in a way that can only exist in politics, you can lose by winning. Every Tory PM that has been obliged to fight a leadership election while in post: Thatcher, Major, May and Johnson, has won. But in each contest the scale of the number voting against has shown how damaged they are and - Major aside (who went on to deliver for his party the largest post-war defeat on record) - cost them their jobs.

Johnson won with 211 votes - almost 59%. That looks pretty comfortable, until taken into account that there are around one hundred ministers from whom loyalty to the Prime Minister is expected. In other words a sizeable majority of Conservative backbenchers had, almost certainly, voted against their leader. Nonetheless, with his characteristic hubris, Johnson - bedecked in his emperor's new clothes - declared a great win ("I've got a new mandate from my party which I'm absolutely delighted with ... it's done") and returned to trying to keep his increasingly crippled government on the road.

Wakefield and Tiverton and Honiton

The anti-Johnson forces had, in fact, fired the starting gun on the leadership election far too soon. This was because two parliamentary by-elections were looming: one in the rock-solid Devon seat of Tiverton and Honiton; the other in Red Wall Wakefield. Both of these were Conservative-held and both were triggered by unsavoury behaviour by their MPs.

Lib Dem Tiverton and Honiton campaign HQ

Tiverton and Honiton MP Neil Parrish had been observed by fellow Conservative MPs visiting a porn site on his smart phone in the House of Commons chamber. His excuse was that he had been searching for a tractor for his farm with a name sufficiently similar to that of a porn site to take him in an unexpected direction (though he

subsequently admitted returning to that site, again in the Commons, this time intentionally).

Imran Ahmed-Khan, the MP who had gained Wakefield for the Conservatives in 2019 for the first time, was in even bigger trouble. He was sentenced on 23 May to eighteen months in prison for an historic sexual abuse crime, having refused to resign for almost a month from conviction to sentencing, allegedly to wring one more month's pay out of taxpayers.

The Lib Dems overturned a 24,239 (40.7%) majority in Tiverton and Honiton on a 27.55% swing, adding to their earlier by-election gains of Chesham and Amersham, and North Shropshire (Owen Paterson's former seat). Labour regained Wakefield on a much more modest 12.8% swing - more than enough but a far cry from the landslide wins Labour racked up prior to the 1997 general election in constituencies like Dudley West, Wirral South and South East Staffordshire.

These massive defeats, following on from the May local elections, simply perpetuated the whiff of decay of the Johnson government. Yet that intemperate vote of no confidence - possibly engineered by his allies to get a challenge out of the way before these inevitable by-election losses - meant that the Prime Minister could not again be hauled up for another leadership vote for a year. And by June 2023 it'd be far too close to a general election to risk another indulgent leadership challenge. At least, that was the belief of his backers.

Yet it was abundantly clear to most, inside and outside of Westminster, that Boris's Ready Brek-esque election winning glow had vanished: he was now an electoral drag on the party. Conservatives hadn't lost Wandsworth and Westminster because Tory voters had suddenly decided they were delivering terrible services and desperately wanted Labour-led councils: they were refusing to support Boris.

The Tories didn't lose Tiverton and Honiton or Chesham and Amersham or North Shropshire because the Conservative candidates were dreadful: they lost because of Boris. Loyalist MPs tweeting desperately that they were only elected in 2019 because of Boris - such as Shaun Bailey in West Bromwich - struggled to grasp that Labour had re-established commanding leads in May's local elections in their constituencies. Because of Boris.

The very characteristics that the Conservative Party desperately needed in the second half of 2019 to renegotiate Theresa May's (at least to Brexiteers) disastrous EU Withdrawal Act, break the

parliamentary deadlock and then storm the country, booting out so many of the Labour and ex-Tory MPs that had blocked Brexit, were now the very characteristics a large chunk of the country (and, more importantly, the Tories' electoral coalition) was dismayed by.

And then came the final breach of trust with Johnson: Chris Pincher.

The Pincher scandal

Pincher, the party's deputy whip, had already resigned from a more junior whip's position in 2017 following allegations from a former Olympic rower of unwanted sexual advances. The subject of Pincher's advances described him as a "pound shop Harvey Weinstein" for offering him the inducement of help becoming a parliamentary candidate in exchange for sex.

On 30 June, Pincher again resigned from the whips office having allegedly sexually assaulted two men at the Carlton Club after getting wildly drunk.

These claims, objectively, were far more serious than the Neil Parrish porn scandal, which had caused a by-election. But Pincher didn't resign and, for reasons inexplicable, Downing Street appeared to be standing by the man, who'd had the whip suspended. Furthermore, Johnson reverted to Partygate type by issuing statements claiming he'd not known about the 2017 complaints and, just as with Partygate, further allegations kept emerging of a long history of Pincher's misconduct. It beggared belief that Johnson was unaware of the allegations. Again he appeared to be lying to MPs, lying to the country and indifferent to the damage this was doing to his party.

Conservative MPs had had enough. Several had already re-submitted letters of no confidence in Johnson just days after the confidence vote and despite knowing he was immune from challenge until summer 2023. Some argued that, with a critical mass of new letters submitted, the 1922 Committee would be compelled to rewrite the rules enabling a fresh challenge, albeit with perhaps a much higher threshold before it could be triggered. The rebels believed they could over-shoot whatever that threshold would be.

But it was not backbenchers that brought down Johnson. It was his previously loyal ministers.

Mass ministerial resignations

On 5th July, Sajid Javid - the former Chancellor, Home Secretary and Health Secretary who had replaced Matt Hancock after his lockdown love affair was exposed - resigned from government, explicitly because he regarded Boris Johnson as having lied to him about the Pincher scandal. He asserted that he was now embarrassed by having to go on broadcast media to defend the indefensible when not being told the truth by the Prime Minister. Within minutes, Chancellor Rishi Sunak resigned too. By midday on 7 June sixty MPs had resigned from government positions, Johnson had sacked Michael Gove, and the government was in meltdown. It was clear to everyone but Johnson that he could no longer form a government, though he kept trying. The Chancellor of the Exchequer Johnson appointed to replace Sunak, Nadhim Zahawi, promptly and bizarrely demanded his resignation.

Briefings soon emerged that Johnson regarded the mandate the Conservative Party had won at the 2019 general election to be his personally - and this was the foundation of why he was refusing to countenance resignation: because he had not delivered on the mandate he personally had won. He hadn't but almost three years into his administration how was that an endorsement of his record?

It further emerged that the Prime Minister planned, as the nuclear option, to visit the Queen to seek a dissolution of parliament and a new general election. That would have been a massive threat to Conservative MPs given Labour's poll lead was now in double digits according to most pollsters.

Had Johnson tried this he'd have almost certainly failed because our unwritten constitution requires the monarch, before consenting to an election, to be sure there is no-one who can form a government. The Conservatives still retained a big, albeit much diminished, majority in the Commons. Almost any other Conservative alternative to Johnson would be able to command a majority, albeit a fractious one. It was Johnson who was no longer able to lead the country, not the Conservative Party.

Johnson resignation front-page montage

Eventually even Boris Johnson could not defy gravity and he crashed to Earth, announcing his resignation as Prime Minister later on 7th July. Johnson had to go - but that did not mean there was a replacement who could restore the Conservatives' electoral allure.

Truss vs. Sunak

An apparently expedited leadership election was held that would take two months, in the midst of the Ukraine War, an energy crisis, surging inflation and the increasing problems of the pandemic aftermath. Rishi Sunak emerged as the choice of the largest number of MPs - though he was also the most stringently disliked by the core of Johnson loyalists who held him largely responsible for Boris's downfall. Runner up position appeared to be going to Commons Leader Penny Mordaunt before the votes of Brexiteer MPs for some unfathomable reason coalesced behind Remain-backing Foreign Secretary Liz Truss to pip Mordaunt to the post on the final battle.

Truss and Sunak knocked seven shades out of each other over the summer in hustings around the country, Truss arguing for a grassroots-appealing supposedly "Thatcherite" agenda of tax cuts, deregulation, freeing Northern Ireland from the EU protocol that created a trade border down the Irish Sea and much more besides. Extraordinarily, given he claimed to have voted Leave, Sunak became the voice of the establishment, arguing for caution and defending the government's post-war high tax and borrowing programme. He almost seemed to be arguing that he voted Leave to keep everything the same.

In part because her pitch was better calibrated to Conservative members and in part because Rishi could not shake the tag of Boris-slayer, on 5th September Truss won - though by a slightly closer margin than member polling had suggested she would (57% to 43%). On 6th September 2022 Liz Truss became the country's 56th Prime Minister.

Truss elected front-page montage

The Truss interregnum

Whatever your view of her, Truss had one of the most challenging peacetime baptisms of fire as Prime Minister. She met the Queen at Balmoral to officially accept office on 6 September. On 8 September the Queen, our longest reigning monarch, died.

The images of the quarter of a million mourners visiting Westminster Hall around the clock, of the sentries standing guard around the catafalque, and of the princes and princesses taking their place will be among the images of the decade.

But the storms facing the government were not diminished by the change of Prime Minister. While the financial help Sunak as chancellor had announced in the spring was about to kick-in, energy prices had climbed ever higher. The OFGEM energy price cap, set at £1,042 in February 2020, climbing to £1,971 in April 2022 was announced during the leadership race to be set at to £3,549 in October 2022. As Truss entered Downing Street OFGEM was announcing the January cap would reach £4,279. Household financial expert Martin Lewis was again pleading with the government for extensive intervention.

The Truss government responded in ways that exceeded the expectations of commentators: announcing that the government would subsidise the cost of energy so that the typical household would pay no more than £2,500 for their energy. In other words the government would pay the difference between £2,500 and the market price.

This was arguably the level of support needed though plenty argued that only those on benefits should get the extra help. But with energy prices still on the up the cost of the policy coming on top of the billions spent on lockdown maxed out government borrowing.

The magic money tree, felled

For years there has been pushback among left of centre economists and politicians that government spending is not like household spending because any country with a central bank can print unlimited amounts of money. A household has to live within its means or face bankruptcy. A government does not.

If the Truss government achieved one thing it was to test this delusion to destruction. In addition to the additional energy help the new Chancellor of the Exchequer: Kwasi Kwarteng announced, a series of tax cuts (in fact mostly choices not to proceed with Sunak's previously planned tax increases) and some supply side measures (such as action to make childcare more affordable) to "go for

growth" rather than continue the inexorable drift to a high tax, high spend state.

There were three key flaws to this plan. First, boosting growth - growth being, essentially, increasing demand and creating more stuff - at a time of high inflation would further stoke those inflationary flames.

Second, the entire cost of these tax proposals - estimated at £45bn (though, as with virtually all economic costings, a highly questionable assumption assuming prices don't change - and energy prices subsequently fell, a lot) were funded from additional borrowing. And those that money is borrowed from - international markets - decided that they weren't prepared to lend so much more to a country already up to its ears in public debt.

Third, the country was already mortgaged up to the eyeballs because of Covid spending, the increased cost of servicing too much debt and, ironically, Rishi Sunak's spring £400 per household energy bill handouts.

The BoE: doesn't do what it says on the tin

Three other factors conspired to create a spectacular economic crisis, and these were all beyond the government's control - culpability lies fully with the Bank of England.

The first was the Bank's failure to do the one task set it: control inflation. All central banks appear to have not understood that a global economic awakening after an unprecedented shutdown would bring huge inflationary pressures, especially after a decade of money printing that held interest rates down unsustainably. But the BoE was among the most sclerotic in responding. In contrast the US Federal Reserve began cranking up interest rates aggressively much earlier with the consequence that the dollar strengthened markedly against all major currencies including the pound.

The second was the bizarrely-timed announcement by the Bank that it was to start selling off the Covid bonds the government had raised during the pandemic, at a time when the market was saturated with bonds and investors were anxious about the direction of the global economy.

The third was an obscure issue with pension funds - so called Liability Driven Investments (LDIs) - which had serious echoes of the sort of low quality mortgage products banks gambled with that brought about the 2008 financial crisis. Extraordinarily the BoE attempted to blame the government for its regulatory failings in respect of LDIs. While it is self-evidently the case that the fall in the pound against the dollar, the lack of credibility of the Chancellor's unfunded tax cuts and the rise in interest rates brought these huge pension funds to the brink, this was essentially yet another regulatory failure months and years in the making.

This was an economic shock of similar magnitude to Britain being ejected from the Exchange Rate Mechanism in 1993, though whereas that trauma began a period of economic prosperity that lasted through to the crash of 2008, this new seizure led to significant risk to the public in the midst of a cost of living crisis. And, just as the Conservatives had been in power for fourteen years when the ERM crisis destroyed their economic credibility, likewise attempting to blame anyone else for this new meltdown was absurd.

Conservative support tanks

In the space of less than a year, the Conservative Party went from leading Labour to falling a catastrophic thirty percentage points and

more behind Labour. For the remainder of 2022 just five polls (out of 115 commissioned) gave the Conservatives 30% of the vote or more; and as many had them on less than 20%. These were the sort of polling figures last seen during the Major years and would represent an election defeat far more catastrophic than that Labour inflicted on the Conservatives in 1997.

MPs, for whom Truss had only won backing from 14% of in the first round of the leadership contest, and tired of the never-ending political dramas their party had manufactured since Brexit, ramped up the pressure - stirred by troublemakers from the Sunak camp. More than enough of the 86% who didn't nominate her were willing to openly rebel - even on matters such as finance bills, usually regarded as a matter of confidence that could bring down a government; but also on virtually every measure Truss's team floated.

Truss responded by sacking Kwarteng as Chancellor, as if the economic plan he'd just announced was his alone when they were a double act. In his place she returned to government Jeremy Hunt from the exact opposite wing of the Conservative Party to her. Hunt had, however, held several government positions including Foreign Secretary, and was seen as a safer pair of hands, able to steady the market turmoil. But the price of a Hunt chancellorship was to reverse all of the Truss tax cut agenda: she instantly became a Prime Minister in office but not in power. No PM can survive such a diminishment, especially one without a direct mandate from the public and with so few supporters on the benches behind her. After just 49 days in office, on 25 October, Truss resigned.

Three Prime Ministers in a year

For a while it looked as though the Conservatives would put the country through another full leadership election. The 1922 Committee rolled out another staggered timetable of votes. Boris Johnson, caught out by the resignation and on holiday half way around the world, scrambled to get home in the hope Tory MPs had learnt their lesson and would rally to put him back in No.10. But his hopes were dashed: MPs wanted neither Truss nor Boris - they were quickly lining up behind Rishi Sunak as the sole nominee.

There were risks here: Conservative Party members had opposed Johnson being ousted, had only weeks earlier rejected Rishi Sunak, and were now having him foisted on them. Affluent Boris Johnson backers tried stirring up dissent in the grassroots against this coup, and it alienated enough Conservative traditionalists to breathe a little life into Reform UK, in lineage the successor to the Brexit Party and UKIP, but without Nigel Farage's rabble-rousing leadership.

In most polls until autumn 2022 Reform had been polling as much as 3% - though most respondents were probably stating support for UKIP or BxP: Reform had too low a profile for most politics-averse citizens to even notice it. In most polls since, Reform has polled between 5% and 10%: similar in support to the Liberal Democrats but hardly the territory of political realignment.

Sunak almost disappeared from view after winning the premiership: to get to grips with the big policy portfolios he had never before needed to be fully briefed on. Other than a year and a half as a local government minister, his fast-tracked government career had been entirely at The Treasury. He reinstated most of Johnson's pre-meltdown cabinet, though bringing in more of his largely Remain-backing supporters: people like Mel Stride, who became Work and Pensions Secretary.

He published five goals, bland and unbinding as he could possibly concoct them so as to guarantee he would deliver them - as though

someone promising to wake up the next morning and then doing so merited acclaim. Even so, he found himself struggling to even reach this low bar as the year went on, with inflation stubbornly resistant, warm weather encouraging a surge in migrant boat crossings, doctors' strikes wrecking the target of reducing waiting lists and various one-off events like the long coronation bank holiday seemingly preventing the economy from lifting off the ground: each quarter either a marginal tenth of a percentage point of growth or contraction.

Although Sunak pulled off a headline-grabbing deal with EU on the Northern Ireland protocol, as so often with this thirteen years of Conservative government it turned out to be more hype and less substantive change. And as Johnson found with Ukraine, so Sunak found out with Northern Ireland: these issues had no day-to-day relevance for mainland voters even if they were supportive of the government's efforts. They did not shift votes.

A Rishi revival?

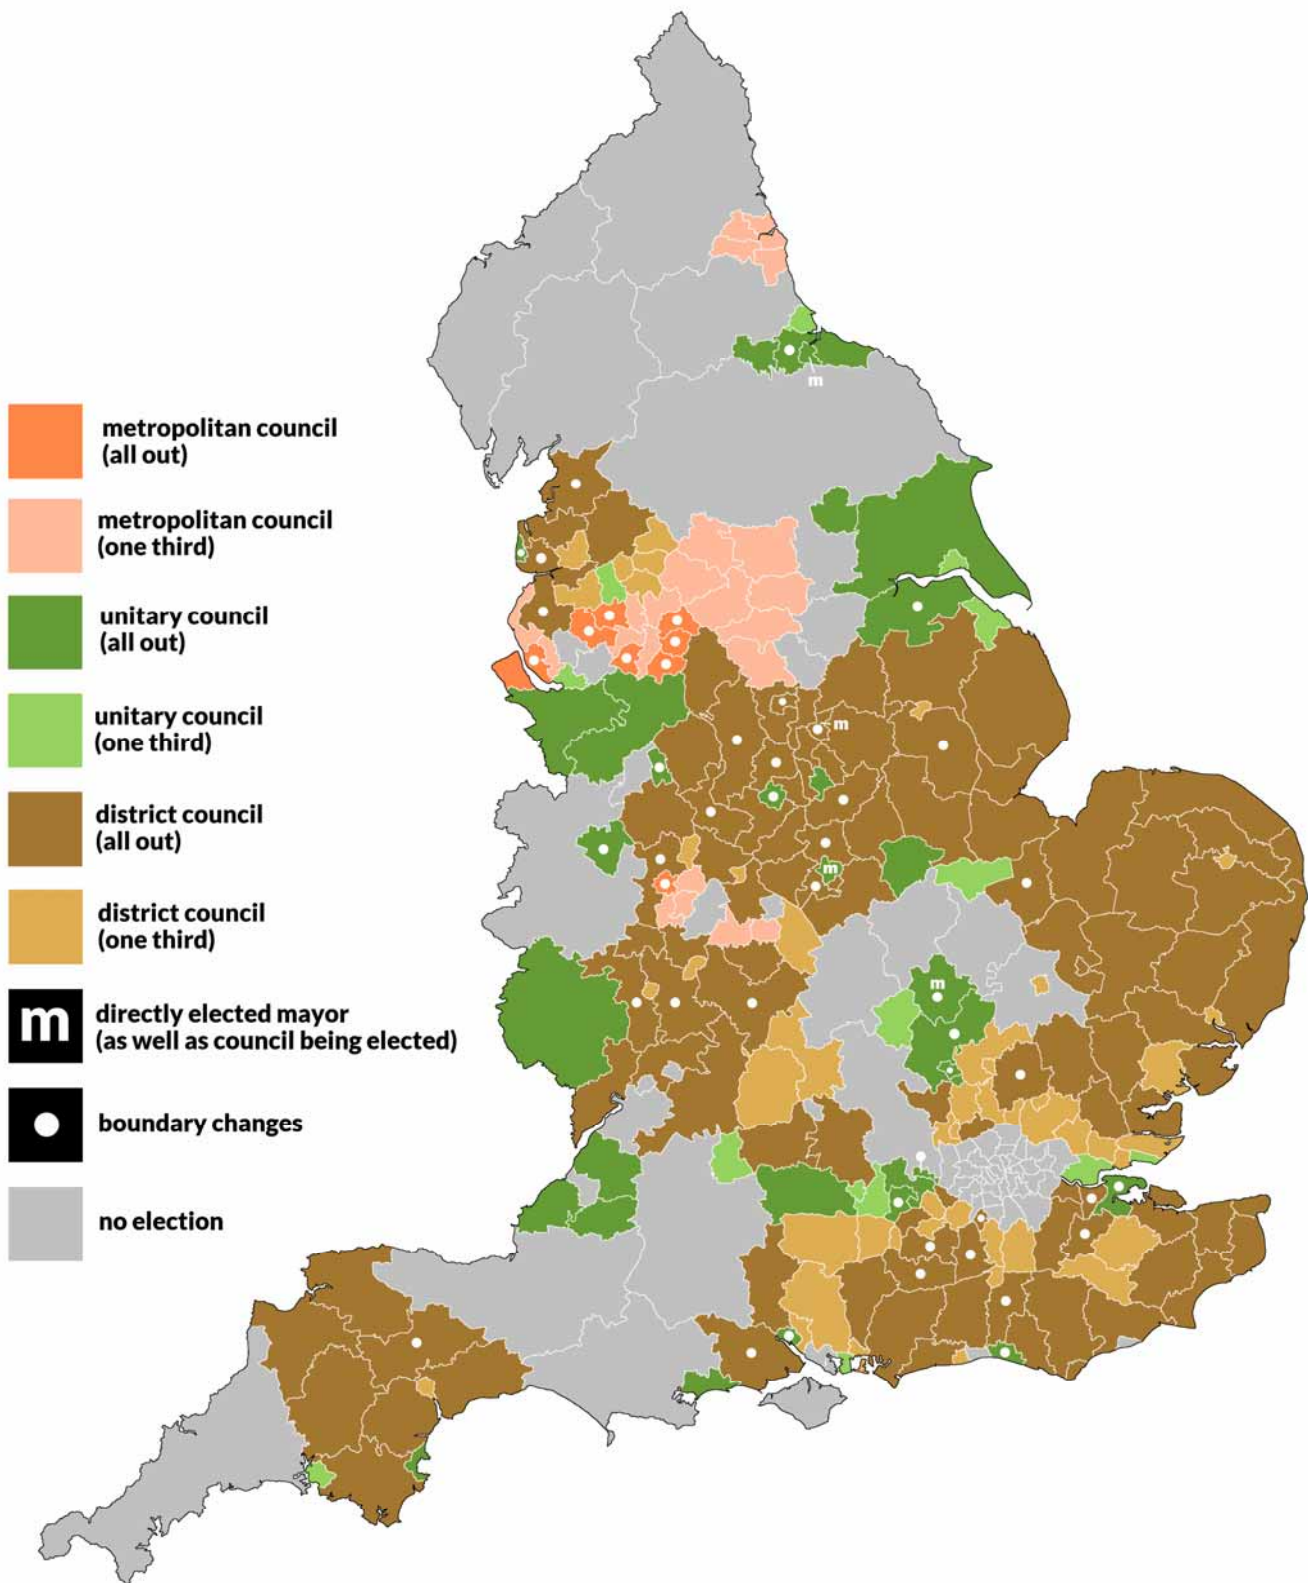

But Rishi Sunak's principal goal, seemingly, was to try to minimise the political drama his party had created for months in the knowledge that the public was sick of it. Perhaps the reasoning was that, with the Conservatives out of mind, governing uncontroversially, voters would slowly begin to give them a hearing again, if not return en masse to the party that had won a landslide barely three years earlier.

The polls did, very slowly, shift a little: the Conservatives now usually polling between 25% and 30% in most, with Labour somewhat above 40%. Although this still left the Tories at least a dozen - and often closer to eighteen - points behind, Reform UK was usually on about seven or eight. Combining the Tory and Reform totals brought the Labour lead down to around ten points: a much more competitive battleground than the headline figures suggested. Polling also continued having two key flags over it.

Firstly, while pollsters broadly produced the same 40%+ share for Labour, the Conservative share was erratic - suggesting both that some of the modelling pollsters were using to measure Tory support was awry, and that there may well be a strong case of "shy Conservatives" - people embarrassed about admitting their political preferences. This has been a problem pollsters have had for a while, most notably prior to the 2015 election when Cameron's Conservatives won a lot more votes than the polls indicated they would.

The other flag was a huge pool of 2019 Conservative voters switching to undecided. This number was far larger than seen before and is key because it should be much easier for the party to win undecideds back than those who have made a full break towards Labour - which is what happened in 1997.

Councils up for election in 2023

Whatever the impact of these two flags on polls, Sunak only managed to shift them so far - and no further. The poll deficit remained vast and stayed that way through to local election polling day. To Conservative misfortune, this dire electoral environment coincided with the largest set of council elections in the four year cycle, combining all councils that elect by thirds each year with those only up once in every four.

This set of seats was last up in the final days of Theresa May's premiership, during the blood and froth of the Brexit deadlock and the hung parliament. Those elections were quite bad enough for the Conservatives, losing nearly two thousand council seats compared with 2015 - albeit from as high a base then as any party can reasonably expect to hold.

There were three reasons for the Conservatives to think 2023 might not be quite as bad as election-watchers anticipated, not least that 2019 had been so bad they couldn't do much worse.

Not only did the divided Conservatives lose 1,997 councillors in 2019, they lost control of 49 councils, one in three of those they were defending. And these losses were, in the main, in traditionally Conservative areas: Mid Suffolk, Uttlesford, Folkestone and Hythe, Torrington, Mendip Hills, Herefordshire, North Kesteven, Cheshire East, South Oxfordshire and Arun, to name just a few. Rishi Sunak's Conservatives could not lose in 2023 what Theresa May's Conservatives already lost in 2019.

But beyond those 49 councils lost, the 2019 results also brought Conservative majorities close to the brink in a further tranche of councils: in Derbyshire Dales, Great Yarmouth, Kings Lynn and West Norfolk, South Hams, West Devon one seat, Boston, Bromsgrove, Chichester, North West Leicestershire, West Lindsey two; Maldon and Rutland three seats; Stratford-on-Avon four; Ashford, South Gloucestershire and Test Valley five.

The Conservatives also hoped that the places these elections were to be fought: overwhelmingly Leave voting, far whiter, far more small-c conservative districts beyond heavily urban conurbations, might be a little more gentle with them than London, Wales and Scotland. There is considerable evidence that the country is realigning, with already Labour voting areas becoming significantly better for that party and the rest of the country becoming somewhat less so. If that trend continued, the Conservatives could exceed expectations because many of the Labour strongholds were not electing this year.

Third, the Conservatives - being more strongly organised in these more suburban and rural areas - would be able to field more candidates than other parties, especially with the decline in Labour membership since Jeremy Corbyn stepped down as party leader.

You cannot win if you do not stand

As expected, the Conservatives nominated by far the most council candidates, contesting 7,489 (93%) of the 8,057 seats up for election (there were an additional 51 by-election seats being contested). Labour fielded 6,196 candidates (77% of vacancies), the Lib Dems 4,779 (59%), Greens 3,306 (41%), and Independents and assorted residents' associations 2,706 (34%). Reform UK stood 477 candidates (6%) which compared with 1,384 (17%) managed by UKIP in 2019 and the 3,995 (44%) they fielded in 2015, a year prior to the EU referendum.

The parties' respective areas of strength and weakness was reflected in their ability to contest seats. The Conservatives contested just 87% of seats in Metropolitan districts - the big mostly

city councils beyond London - including just 45% of the seats in Liverpool which held all out elections.

Labour, in contrast, managed to contest barely two thirds of seats in non-metropolitan districts and just 48% of seats in councils in the south west, managing to find just three sacrifices to offer up in the Gloucestershire district of Cotswold.

	Con	Lab	LD	Grn	Ind
Total (8,057)	7,489	6,196	4,779	3,304	2,253
Percentage contested	93.0	76.9	59.3	41.0	28.0
Mets	86.6	99.6	67.1	62.9	22.9
Unitaries	93.1	85.7	63.6	36.7	34.9
Non mets	94.2	68.3	55.2	36.8	27.0
South East	98.4	68.5	67.5	43.0	18.7

North East	90.4	94.3	42.2	51.2	50.6

A failure to field candidates in seats a party is almost certain not to win matters not in the direct sense, but it does warp the council-wide share of the vote that party would appear to have posted. In reality they will be stronger, but we lose the ability to know by exactly how much.

The result

At first glance, the headline 2023 local election results do not look all that much like the Labour triumph the opinion polls, with their massive Conservative deficits, forecast. There was a 2.95% swing from Conservative to Labour compared to the adjusted 2019 results - the last time these seats were contested (for an explanation of how I and why I adjusted the 2019 results, see the caption below the results table). 2019 was hardly a good year for the Conservatives, but it wasn't terrible either.

	Votes	%	2019
Labour	2,840,264	30.9	+3.7
Conservatives	2,681,582	29.2	-2.2
Liberal Democrats	1,681,992	18.3	+1.8
Green	950,669	10.3	+1.1
Independents	735,851	8.0	+0.7
Others	1,030,871	3.2	-5.3

The results in England, adjusted to remove from the 2019 totals those councils that have been abolished in the interim (all districts in Cumbria, North Yorkshire and Somerset, plus St Helens which moved to quadrennial elections in 2022)

There are a number of reasons why these headline figures don't reflect party strengths accurately. We've just looked at one: the failure of parties to field full slates of candidates everywhere. But there are more significant factors: principally that different areas elect in different years. No London, Welsh or Scottish councils elected. Unitary councils covering whole counties like Cornwall, North Yorkshire, Somerset, Northumberland and Wiltshire did not

The 2023 dashboard: how the councils voted

elect this year. The absence or inclusion of these councils skews the base result. The councils up this year were more favourable to the Conservatives because more affluent rural and suburban districts were up for election. In 2022 they were more favourable to Labour. Labour also tends to fare more weakly in local elections than in general elections. That may be more suspicion of the party running local councils or a greater difficulty in motivating its loyalists to vote in what are seen as comparatively unimportant elections.

That's why experts like Professors Rallings and Thrasher of the Local Elections Centre publish what they term the National Equivalent Vote (NEV), which attempts to adjust for these changes in the types of council up for election each year. This is not an estimate of how people would've voted in a general election held the same day (vastly more votes go to smaller parties in local elections than generals, for example); just an estimate of what local elections vote shares the parties would have won if every area of the country had held elections. These figures produced an eight point Labour lead and a 4% swing from 2019:

Labour	36%	+ 5
Conservatives	28%	- 3
Liberal Democrats	18%	+ 1
Others	17%	- 4

So, even on the adjusted figures, the Labour lead did not come close to replicating the 20% leads the opinion polls suggested the party was ahead by.

Nonetheless, this swing from the Conservatives to Labour and the Liberal Democrats - and the fact that there was no such thing as a uniform national swing: in specific areas it was very much more pronounced - produced a big loss of councils controlled and enabled Labour to claim it was on track for power at the next general election.

	Councils	Change	Cllrs	Change
Con	70	-73	2,296	-1,263
Lab	99	+8	2,675	+655
LD	37	+14	1,628	+277
Green	1	+1	481	+218
Others	4	0	945	-287

The Conservatives were massive losers using seats won and councils controlled, rather than votes cast. Labour look less clear-cut winners using this metric: just eight councils gained and 655 councillors added. This can be viewed in one of two ways. Either voters wished to kick the Conservatives hard but were not sufficiently convinced by Labour to give them the scale of kicking they delivered in the run-up to the 1997 general election. Or voters decided to use whichever party was most likely to defeat the Tory candidate, and in the typical seat up this year, that simply was not going to be Labour.

Labour had extremely good results in places - like Kent, Staffordshire and Derbyshire, and only barely passable results in others - such as the West Midlands conurbation, Essex and Leicestershire. But such is the nature of local elections: even this year the Conservatives were able to gain the mayoralty of Bedford, Torbay and Wyre Forest councils, plus minority control of Slough and a big increase in councillors in Leicester; they lost very few councillors in the Mets seeing off Labour easily in Dudley and *Walsall.

The big Conservative thumping came in the non metropolitan districts. 4,437 Tory councillors were elected in these councils in 2015, falling to 2,742 in 2019 and just 1,649 this year. That is a massive loss. Yet Labour has only increased its total of non-met councillors from 985 in 2015 to 1,165 this year. And that is one major piece of evidence for those who argue Labour did not demonstrate that it was on course for a landslide result at the next general election.

Major Conservative losses

Council	Seats lost
Bracknell Forest	- 28
East Suffolk	- 25
Wealden	- 25
Amber Valley	- 24
Central Bedfordshire	- 24
East Hertfordshire	- 24
Bournemouth, Christchurch and Poole	- 23
Horsham	-21
East Riding of Yorkshire	- 20
New Forest	- 20
Lewes	- 19
Tonbridge and Malling	- 18
Mid Sussex	-17
Bracknell Forest	- 16
South Kesteven	- 16
Windsor and Maidenhead	- 16

In Lewes the Conservatives were wiped out, having held 24 of the 41 seats as recently as 2015. There is just one Conservative councillor in South Oxfordshire (Henley) and just three in Bath and North East Somerset (despite the Tory vote dropping by less than half a percent here). In Great Yarmouth the Conservatives lost overall control by one seat, and they lost that one seat - in Yarmouth North ward - by one vote. They lost Bracknell Forest to Labour - something that only occurs when the Conservatives have serious electoral difficulties. Losing Dover and Thanet and Medway in Kent along with Canterbury signals problems in at least four seats, though Labour didn't do nearly so well in Dartford, Gravesham or Chatham and Aylesford constituency.

Biggest falls in Conservative vote share (compared to 2019)

Council	%change
Basingstoke and Deane	-17.6
South Kesteven	-16.5
Castle Point	-16.3
Windsor and Maidenhead	-14.0
New Forest	-13.9
Ribble Valley	-13.8
Plymouth	-12.8
Maldon	-12.4
Epping Forest	-11.9
Luton*	-11.8
Worcester	-11.7
Basildon	-11.2
Stratford on Avon	-10.8
Central Bedfordshire	-10.4
Rossendale	-10.0

*Conservatives only fielded 15 candidates in Luton compared to 43 in 2019, which partly explains their big decline in this council

There was consolation, scant though it was. In Slough, a Labour-run council that had been put in special measures after declaring effective bankruptcy and having to put its council tax up massively, the Conservatives gained fifteen seats to go from just six to twenty one - one seat shy of a majority.

In Leicester, like Slough a council with a very large ethnically diverse population, tensions between the Hindu and Muslim communities, alongside other internal Labour splits, produced seventeen Conservative gains, often on massive swings. Labour retained a small majority and, more importantly, the directly-elected mayorality, but Conservatives polled most votes in the wards comprising the Leicester East constituency.

Biggest increases in Conservative vote share (compared to 2019)

Council	%change
Halton	+6.8
Bassetlaw	+7.4
Stockton-on-Tees	+8.5
Hart	+8.9
Oadby and Wigston	+9.4
Sandwell	+9.7
Torbay	+9.8
Burnley	+10.0
Cambridge	+10.7
Ashfield	+10.7
Bolsover	+11.8
Gravesham	+12.1
Hartlepool	+12.5
Leicester	+13.2
Slough	+14.8

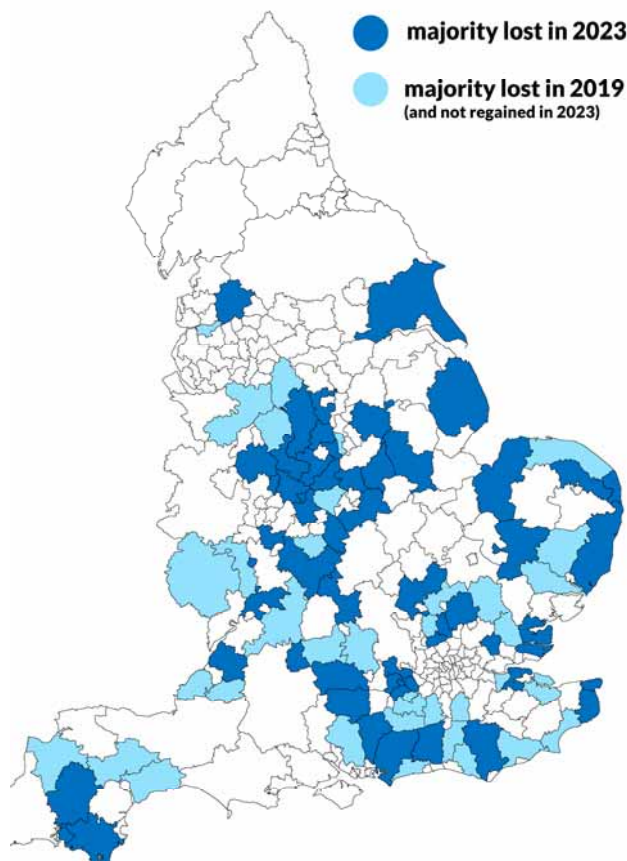

The Tories significantly increased their majority in Cambridgeshire's Fenland district (which Labour surprisingly gained in 1995): one of the most strongly Leave-voting local authority areas in the country, and came close to winning back Herefordshire. Labour made little impact in red wall councils Dudley, Walsall, North East Lincolnshire and North Lincolnshire; failed to retake Bolton or Wirral (both holding all-out elections) and there was little lessening of hostility to Labour in south Essex: Basildon, Harlow and Thurrock (even though the Tories had mismanaged there as badly as Labour had in Slough).

And opposition to Labour Cambridge's congestion charging plans saw big pro-Conservative swings in a couple of wards- the Tories subsequently gaining King's Hedges in a by-election following the local elections. Their vote in Cambridge rose 10.7 percentage points.

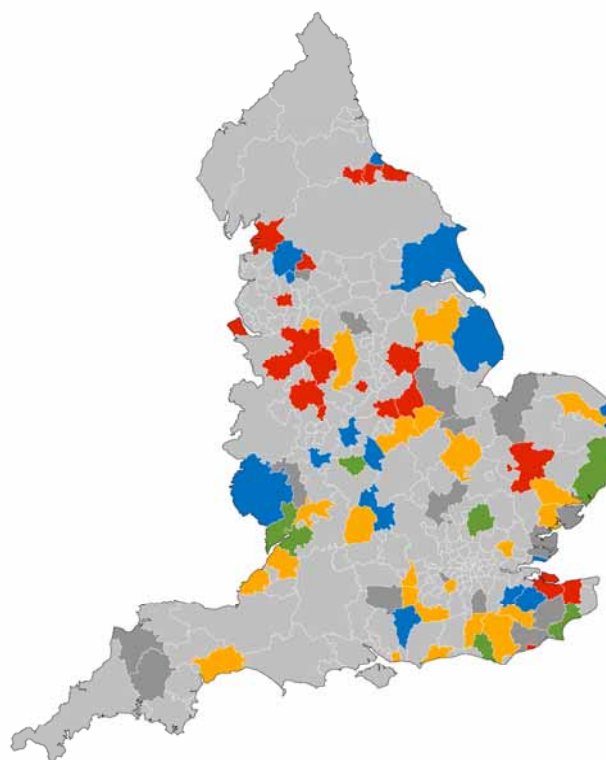

The map opposite top highlights just how big a hit the two very poor elections of 2019 and 2023 have had on the Conservatives.

It shows all the councils the party has lost control of - and because pretty much everyone else elected in these councils is hostile to the Tories, losing their majority equals losing power. This doesn't necessarily apply when Labour or Lib Dems lose their majority: they can usually do a deal to stay in power whatever the electorate intended.

The Conservatives now control just seventy councils, the lowest figure since 1999. But this is still far superior to the eleven they held in 1996. Labour controls ninety nine and the Lib Dems thirty seven. But the biggest "winner" by this measure are councils under no overall control: there are now one hundred and three of those.

Councils Conservatives lost their majority on in the 2019 and 2023 council elections

Lead party in administrations where no party has a majority source: Local Councils-Thorncliffe P.A.

The 2027 Conservative battleground

This chart ranks the swing required for the Conservatives to gain a majority, or remove another party's majority, on each council listed.

21.7	Rutland

Labour scored some gains in Brexit-voting areas that had swung away from them in recent elections: places like North East Derbyshire and Amber Valley, Tamworth, Cannock Chase and Redditch.

But there continued to be a fairly stark difference in voting behaviour between Leave- and Remain-voting areas.

	Con	Lab	LD	Green
Leave 60%+	32.1	34.7	10.9	7.2
Leave under 60%	30.2	29.0	19.7	10.8
Remain	21.0	28.6	21.0	11.8

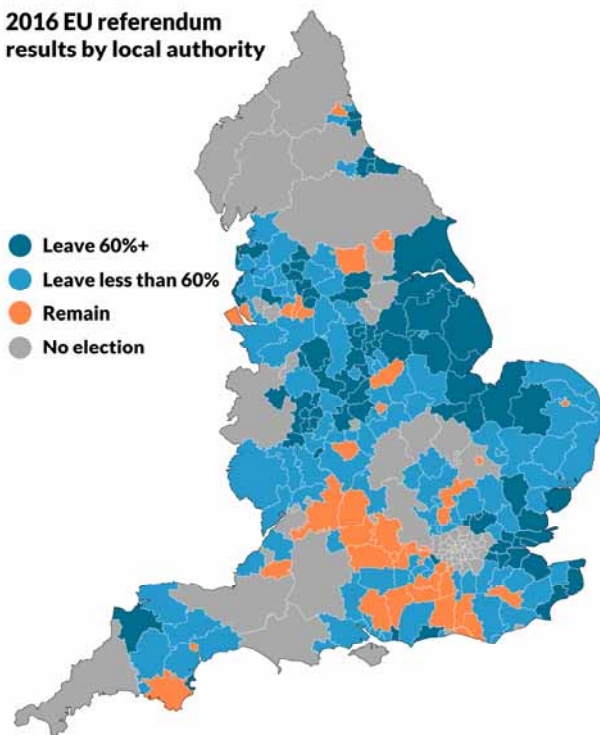

Vote share in local authorities depending on their EU referendum vote

Areas that voted remain - a fairly small number among the councils up for election this year, voted Labour 28.6%, Lib Dem 21.0%, Conservative 21.0% and Green 11.8%.

Areas that gave Leave a percentage of over 60% voted Labour 34.7%, Conservative 32.1%, Lib Dem 10.9% and Green 10.9%.

and areas that had a Leave vote share of between 50.1% and 60% - by far the most numerous set - voted Conservative 30.2%, Labour 29.0%, Lib Dem 19.7% and Green 10.8%.

2016 EU referendum results by local authority

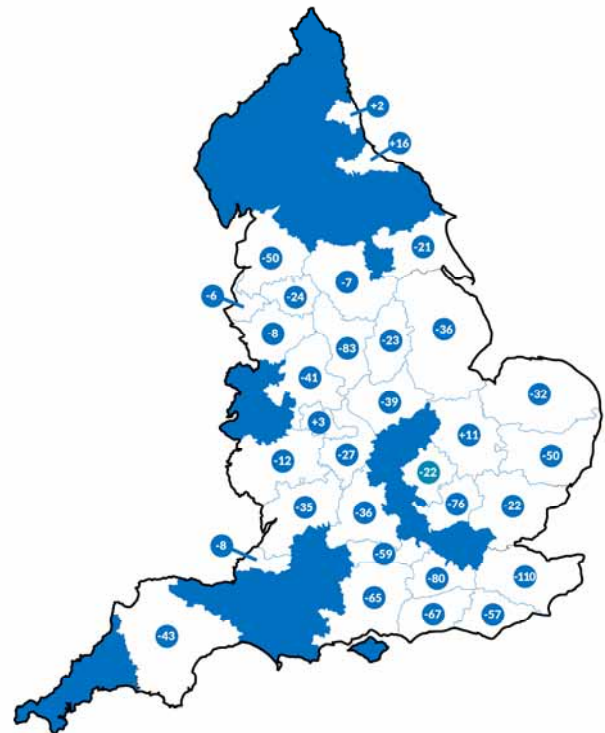

In other words, the Tory vote was eleven points stronger in strongly Leave areas compared to Remain areas and nine points stronger in marginally Leave areas.

This big gap helps explain why the Conservatives did so badly in Remain-voting areas like Berkshire, Oxfordshire, West Sussex, Surrey and inland Hampshire, and specific council areas like Bath, Cotswold and South Hams - areas they hardly performed well in four years earlier when the public were somewhat confused as to

the intent of Theresa May's skewed government but were crushed in this year.

This is not to suggest that Brexit hasn't diminished significantly as a political issue since 2019 - it has, but the fault line in outlook that divides Remainers and Leavers runs far more deeply than this one issue: it is the fault line that is still upturning governments throughout Europe and the Americas: between globalism and nationalism, between liberalism and a more authoritarian politics, between those who benefit from mass immigration and those who have been excluded by it.

Net losses and gains of Conservative councillors by county

Perhaps this gulf explains why Labour didn't perform quite as well as it might have done, compared to the local elections running up to 1997. Then there was no such cultural divide and Labour's grip on so-called red wall areas was very much stronger.

That said, the election produced a decent result for Labour. It was, for example, the first time the party had outpolled the Conservatives on the NEV by more than three percentage points since 2012 and only the second time since the turn of the millennium they had done so (the Conservatives having outpolled Labour by more than three points eleven times in the same period).

Labour's headline gain was the recapture - in a landslide - of Brighton and Hove which had been under no overall control but administered by a Green Party minority. Although the votes were still close in the wards comprising the Brighton Pavilion constituency, the announcement shortly after the results by local Green MP Caroline Lucas that she would be stepping down at the next election makes Labour favourites there.

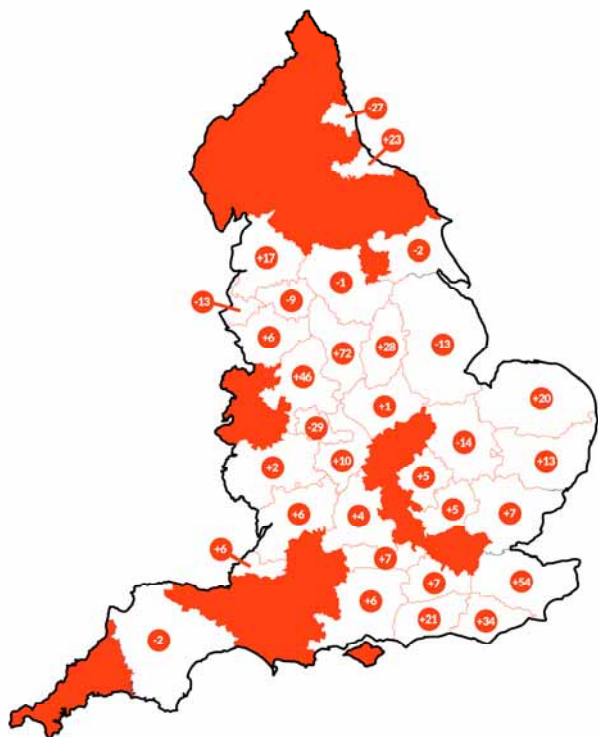

Labour also celebrated a chain of victories in Kent gaining Dover, Thanet and Medway, and becoming the largest party in Canterbury and Swale (Sittingbourne, Sheppey and Faversham). They won four of the six wards covering Folkestone (the other two going Lib Dem and Green) and eleven (to the Tories four) seats in the town of

Ashford = enabling them to remove the Conservative majority there.

Results in Kent were particularly bad for the Conservatives - they lost over one hundred councillors in this county alone - in part because it was their largest concentration of councillors in the country to lose. They went into the election with over 300 councillors and so lost more than a third. Their next largest concentration was in Lincolnshire, with 191, so the magnitude of importance to the Conservatives of Kent is self-evident. There are also plenty of parts of Kent with a long Labour heritage but until this election it had been dormant to the point of invisibility beyond Canterbury since the Labour landslides of 1997 and 2001.

Sizeable Labour gains (council seats)

Council	seats gained
Brighton and Hove	+21
Bracknell Forest	+19
Amber Valley	+14
Bolsover	+13
Medway	+13
Southampton	+12
Stoke on Trent	+12

Net losses and gains of Conservative councillors by county

The other big Labour success story was Derbyshire where the party regained Amber Valley, which now moves to quadrennial elections so the party has at least four years to enjoy its new landslide majority there. Labour also regained Bolsover from independents, though the Conservatives - contesting every ward there for the first time following their shock gain of Dennis Skinner's former seat at the 2019 general election increased their vote share by more than did Labour.

North East Derbyshire, South Derbyshire and Erewash (Accrington) also switched from Conservative to Labour, they regained largest party status in Derby (the only council in the country with elected Reform UK councillors) and won a landslide majority in High Peak. With the Conservatives also losing their majority in Derbyshire

Dales there is now no council in that county they now run, having gone into the election controlling five and running Derby in the minority.

The third county undergoing a significant Labour revival was Staffordshire, though here successes were somewhat more patchy, and from a near-wipe-out base. The headline result was an easy recapture of Stoke-on-Trent from independents. Labour comfortably outpolled the Conservatives in the wards comprising Stoke Central; less so Stoke North (which in any event includes Kidsgrove from Newcastle-under-Lyme district and which didn't elect this year). The Conservatives easily outpolled Labour in Stoke South, which becomes better for them in the parliamentary boundary changes.

Biggest increases in Labour vote share (compared to 2019)

Council	%change
Havant	+20.4
Rushmoor	+17.3
Redditch	+17.1
Hartlepool	+16.3
Salford	+15.1
Melton	+15.0
Worthing	+14.9
Tamworth	+14.7
Thurrock	+14.6
York	+13.7
Cannock Chase	+13.5
High Peak	+13.1

Labour also gained East Staffordshire (Burton and Uttoxeter) and removed the Conservative majority in Stafford, Staffordshire Moorlands, Cannock Chase and Lichfield. Though Labour won eight of the ten seats up in Tamworth, the Conservatives retained control because they won by similarly lopsided margins in the last two rounds of elections. A Labour win of this sort in 2024 - likely following the party's win the Chris Pincher-caused Tamworth by-election - would give them a council majority, leaving the Tories with just South Staffordshire and Newcastle-under-Lyme (though they continue to run Lichfield in the minority).

Biggest falls in Labour vote share (compared to 2019)

Council	%change
Liverpool	-11.2
Boston	-15.5
Slough	-19.2
Leicester	-19.4

*Labour only fielded 3 candidates in Boston compared to 22 in 2019, which partly explains their big decline in this council

Beyond those three counties, Labour gains were much more difficult to pry out, up just five, six and seven seats respectively in the electorally huge counties of Hertfordshire, Hampshire and Essex, and net up seven in Berkshire where their spectacular gain of Bracknell Forest was offset by their spectacular loss of Slough. Though Labour gained 23 seats net in Teesside, the Tories also gained sixteen there which is why, the recapture from independents of the Middlesbrough mayoralty, no other progress was made; notably their failure to regain a majority in marginal Darlington and Hartlepool.

Labour's landslide list

Before this year's election, these 175 wards were ones Labour had won in the past - mostly 1995 or 1999, but not for several elections. This list, coloured for whichever party won them this year, is another way to measure how close to replicating Tony Blair's 1997 landslide Sir Keir Starmer would come this year. Turning these (mainly) blue wards red would demonstrate that the big poll leads Labour was registering were broadly accurate. Twp flags though. Boundary changes have affected almost every ward here. The political realignment caused by Brexit and demographic changes since 1997 may have put some of them beyond reach, while enabling Labour to win others they missed in earlier years.

While the Conservatives were Labour's principal opponents in these elections, there were also Labour-Lib Dem skirmishes and, in these, Labour did not perform well. The Lib Dems widened their majority in Hull, held their own in Stockport and Colchester and won more votes in the south of Luton - albeit in part that the Conservatives didn't stand against them, leaving the non-Labour vote united behind the Lib Dems.

They also continue to overtake Labour as the main alternative to the Tories in Hertfordshire. They Prior to the 1997 landslide, Labour had majorities in Watford, Dacorum (Hemel Hempstead, Tring and Berkhamsted), Welwyn Hatfield, Hertsmere, North Hertfordshire and Stevenage. They won none of these councils in 2023 bar Stevenage - and the reason was voters opting for Liberal Democrat candidates instead.

In fact Labour's problem was wider than just the Liberal Democrats. We look at the Green Party breakthrough a little later, but a similar problem of being supplanted in areas with a Labour heritage occurred in places like Forest of Dean, Worcester, Lancaster and Hertford, The Greens are also advancing in the Labour stronghold - a near Labour monopoly once - of South Tyneside, and Green gains in Wirral prevented Labour retaking control there (he Greens polling the most votes in the current Wirral South and what will be a redrawn Birkenhead at the next election). Labour was blocked from taking Folkestone and Hythe by Green Party successes.

Indeed, for all the talk of a revival of tactical voting - the process by which anti-Conservative voters work out who the most effective challenger is and voting for them, setting aside their own personal preference (and there is some evidence of this), the principal reason why Labour is doing far less well in the run up to the

next general election than in the run up to 1997 is because their path to power in these councils is often being blocked by Greens and Liberal Democrats (and, to a lesser extent, independents).

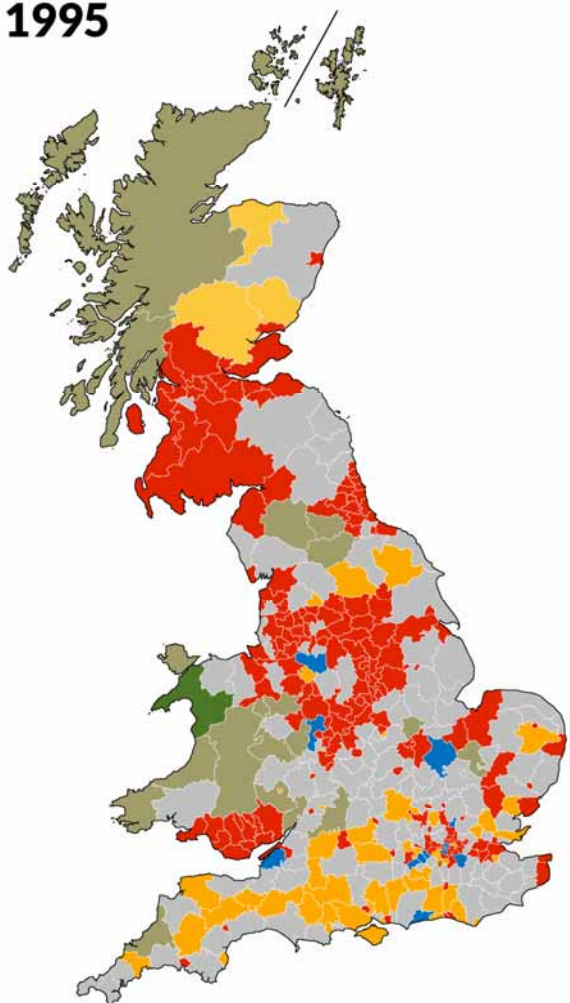

Of course this phenomenon can be argued both ways. For Labour supporters it will be immensely frustrating that these parties are obstructing them; making it much harder to add councillors and administer councils outright. On the other hand, the reason voters are not aligning with Labour in as massive a tsunami as they did in 1994, 1995 and 1996 is that their party is evidently still viewed with suspicion among a very large section of the electorate.

While there is no question that, for the Conservatives, the electoral era most comparable to the mess they are in today is the lead-in to 1997, for Labour this still feels much more like the lead in to 1992. Back then they put in decent-to-good local election performances, and won by-election seats off the Tories like Mid Staffordshire, Monmouth, Vale of Glamorgan and Langbaugh - it just wasn't thoroughly convincing in the way the period 1994-1996 was.

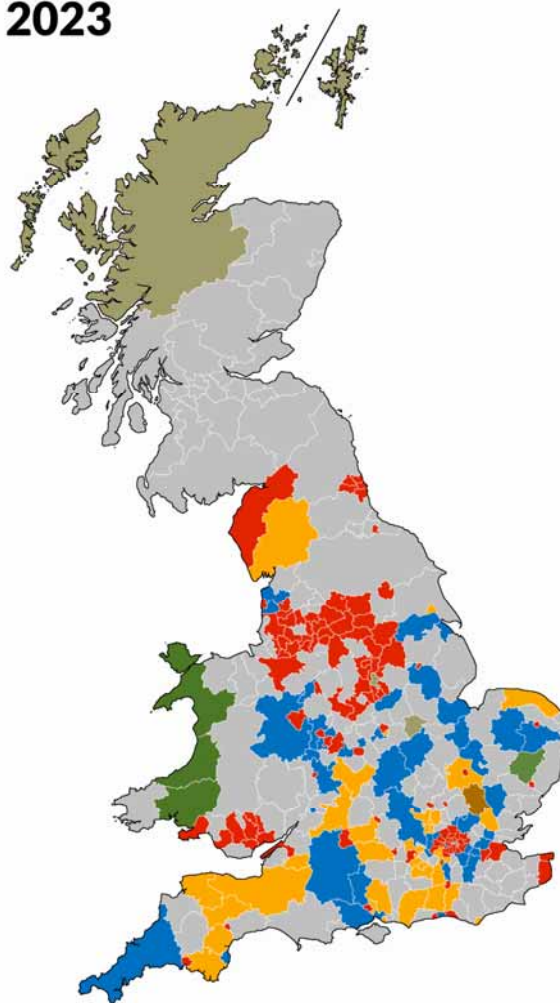

The comparison maps below show Labour is in a significantly weaker position today than after the comparable round of elections in 1995. In part that is because Labour had put in successive rounds of strong local election performances in the years before 1995 and that has not been the case this cycle.

Where there is a similarity in the two maps above is in the performance of the Liberal Democrats. While they aren't quite back to the number of councils they controlled in 1995 - and are nowhere close to either the number of councillors they held then, nor the sort of vote shares they were achieving (27% in 1994, 23% in 1995 and 24% in 1996), the Lib Dems made a huge advance in 2023.

1995

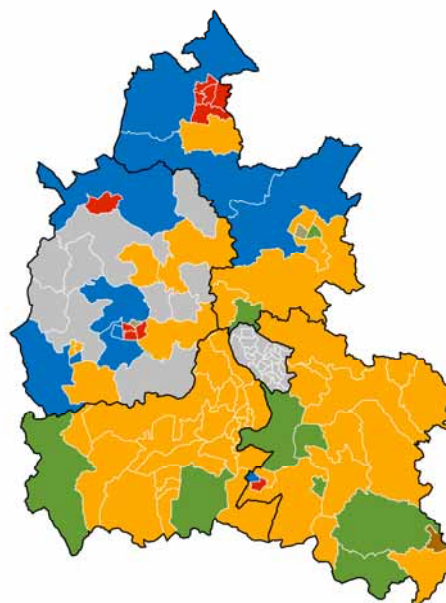

2023

Sizeable Liberal Democrat gains

Council	Seats gained
Mid Devon	+21
Surrey Heath	+17
Chichester	+15
Windsor and Maidenhead	+15
East Riding of Yorkshire	+14
Stratford on Avon	+14
Bournemouth, Christchurch and Poole	+13
West Berkshire	+13

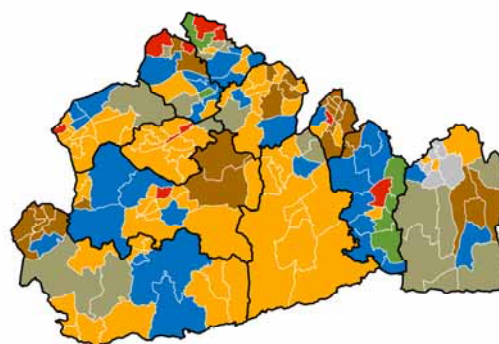

Hull aside, the Liberal Democrat successes were very much concentrated in the south of England, in the main where they had a past history of success but where the Conservatives had bustling them out after 2010. The other feature of the areas they polled strongly in was a substantial Remain voted in the 2016 EU referendum: in particular the home counties and Oxfordshire, plus Devon (which was generally Leave-voting but is historically strong for the party).

Oxfordshire

Biggest increases in Lib Dem vote share (compared to 2019)

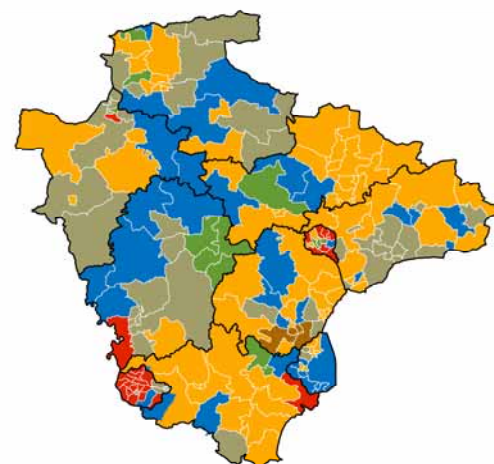

Council	%change
Surrey Heath	+21.1
Woking	+20.2
Elmbridge	+20.1
Windsor and Maidenhead	+19.8
Rutland	+18.5
Luton	+18.1
East Devon	+16.0
Herefordshire	+15.7
Mid Devon	+14.9
Chichester	+14.5
Cherwell	+14.1
Stratford-on-Avon	+14.0
Sevenoaks	+13.3
Test Valley	+13.2

Surrey

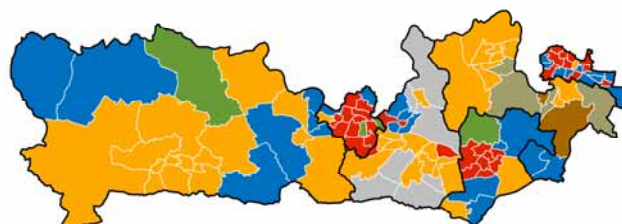

The Conservatives suffered wipe-out or near wipe-out events in a slew of Remain-voting local authorities in no small part because they had already done disproportionately worse in these councils at Liberal Democrat hands in 2019. 2023 just compounded their fall.

In Remain-voting Surrey the Lib Dems won all but two seats in Woking (those outstanding two being Labour and Independent-held), all but three wards in Mole Valley (the council had all-out-elections following boundary changes), managed to overcome the assorted residents' associations and amenity societies in Elmbridge to score a convincing win there, gained control of Surrey Heath - the vast majority of the constituency represented by Michael Gove, easily retained control of Guildford and came four seats short of gaining Waverley - the local authority Jeremy Hunt represents in parliament.

Devon

In Remain-voting Oxfordshire the Lib Dems seized South Oxfordshire where just one Conservative councillor survives. They removed Conservative representation entirely from neighbouring Vale of White Horse - in both instances the Greens are now the official opposition. But, although the Conservatives lost their majority in Cherwell, the difference in support for the party in the only Leave-voting district in Oxfordshire is clear. Here the Conservatives were clearly ahead in votes and remain substantially

Berkshire

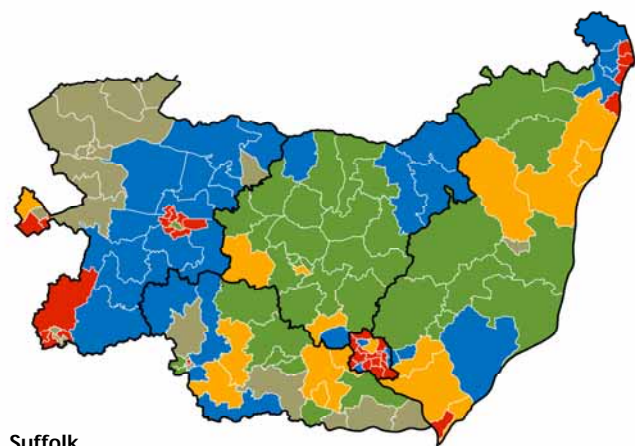

ahead in seats, though in part this is due to different non-Tory parties being strong in different parts of the district: Labour in Banbury, the Lib Dems around Bicester and the Greens in Kidlington.

In Remain-voting Berkshire the Lib Dems ousted the Tories from West Berkshire (Newbury) and Windsor and Maidenhead (where nearly all their gains came in Theresa May's Maidenhead side of the borough), and are within two seats of a majority in Wokingham (with every seat up for election next year following boundary changes). The Conservative rout in Bracknell Forest was achieved by the three opposition parties agreeing not to fight each other in specific parts of the district - with the Lib Dems mopping up in Sandhurst. Somewhat bizarrely, the only council the Conservatives now run in Berkshire is Slough.

In Leave-voting Devon though, some of the Lib Dem success was due to their Tiverton and Honiton by-election win: the eastern ends of East Devon and Mid Devon districts, which comprise that constituency are largely Lib Dem gold now. But which was the Devon district that swung most heavily to the Lib Dems? Remain-voting South Hams (Totnes and Ivybridge). Lib Dems retained their majorities in North Devon (Barnstaple) and Teignbridge (Newton Abbot, Dawlish and Teignmouth), but despite increasing their vote there it was the Tories that regained Torbay - as with Berkshire the only council they control in the entire county.

In very slightly Leave voting Hertfordshire, the Lib Dems have almost complete control of Remain-voting St Albans, and made some decent progress in Remain-voting North Hertfordshire (they will be working hard on the newly-created Hitchin constituency following these results and the Mid Bedfordshire by-election). The Lib Dems now control four Hertfordshire districts outright: St Albans, Watford, Dacorum and Three Rivers (Chorleywood and Rickmansworth) and have significant blocs of councillors in Welwyn-Hatfield, North Hertfordshire and Hertsmer.

The Green Party had its best election ever, their collapse in Brighton and Hove notwithstanding. For the first time ever, The Greens control a council with an overall majority: Mid Suffolk (Stowmarket and Eye). They did well across most of Suffolk, scoring big wins in Babergh (South Suffolk, Sudbury) and made inroads in East Suffolk (the coast from Lowestoft to Felixstowe) - though not Ipswich or West Suffolk (Bury St Edmunds, Haverhill and Newmarket).

While they were losing control of Brighton and Hove, the Greens became the largest party in next-door Lewes, polling just shy of 30% district-wide. Lewes is their strongest council in Sussex but they also gained significantly in Arun (Arundel, Bognor Regis and Littlehampton), Chichester, Horsham, Mid Sussex and Wealden.

They came very close to taking overall control of Forest of Dean, principally by replacing Labour as the main alternative to the Conservatives. Gloucestershire is another county with a lengthening history of Green strength given their longer-term consolidation in Stroud and Bristol (which did not elect this year) though the Lib Dems offer a more substantial block to them here than in Suffolk.

While the Greens have been building for two or three elections in Forest of Dean, their surge in East Hertfordshire came, almost, from nowhere: in the 2015 council elections the Tories won every seat in East Hertfordshire. Following twenty-four losses, seventeen to the Greens, they are not even the largest party.

Biggest increases in Green Party vote share (compared to 2019)

Council	%change
Mid Suffolk	+19.0
Rossendale	+13.0
Horsham	+12.4
Stafford	+11.3
Broxbourne	+10.4
East Hertfordshire	+10.3
South Norfolk	+10.1
Worcester	+9.9
Arun	+9.7

In Kent, the Greens strengthened further in Folkestone and Hythe: an example of another opposition party blocking Labour in an area it has some strength, and where there used to be a strong Liberal Democrat vote. Their strength in Folkestone and Hythe spilt over into Ashford, while further afield the Greens made further ingress in Tonbridge and Malling and kept their grip on Faversham in Swale.

Biggest falls in Green Party vote share (compared to 2019)

Council	%change
Melton	-18.1
Brighton and Hove	-10.6
Lincoln	-8.8
Solihull	-8.1
High Peak	-7.7
South Staffordshire	-7.7

Like the Lib Dems, the Greens are essentially a party of the south of England: they find it very much harder to dig-in up north. There are no big city councils other than - arguably - Sheffield where the Greens are establishing themselves as a progressive alternative to Labour. Perhaps this will change if or when Labour is next in government and the protest votes are mobilised against them. The Greens may then be the beneficiaries: as they are positioned as somewhat to the left of Labour they may be a more credible recipient of such votes than the Lib Dems who are still searching for a unique selling point beyond being the most extreme party of Remain.

Despite not making much of an inroad into the big cities, the Greens do have bases of support all the way north to districts like South Tyneside, where the non-Labour vote is beginning to coalesce behind them. Here, other than independents, the Greens essentially have the opposition vote all to themselves; The Lib Dems are non-existent and the Conservatives incredibly weak.

The 2027 Labour, Lib Dem and Green battleground

1.0	Canterbury
1.6	Great Yarmouth
1.6	North Warwickshire

13.5	Warwick
18.3	East Suffolk

The Greens advanced in their best northern opportunity: Lancaster, where between them Labour and the Greens now hold forty five of the sixty-one seats.

Finally a note on Independents and residents' association groupings. Independents have been in a fairly steep and rapid decline in local government for fifty years; essentially now banished to one council in Wales (Pembrokeshire) and the Highlands and Islands of Scotland. But they staged a modest comeback in 2023 and now control five councils. Residents easily retained their fortress of Epsom and Ewell which they have held since its creation in 1974, and more narrowly kept hold of Uttlesford (Saffron Walden) in Essex.

To these, independents seized control of Castle Point where the Tories are in freefall, essentially over deeply unpopular house-building plans, and also Boston in Lincolnshire. An assortment of independents and residents gained a majority on Tandridge (East Surrey) and the Tunbridge Wells Alliance is part of an anti-Conservative majority in that district. Independents are the largest grouping on Central Bedfordshire council, gaining fifteen to take them to twenty-seven, seven more than the Conservatives there. And, although they did not gain any seats in Maldon, a Conservative slump there made independents the largest party. There are twice as many independents as the next largest Lib Dem group in Torridge, Devon and they have only one seat less than the Tories in neighbouring West Devon. In North Somerset they are two seats behind the Tories; another council where non-Conservatives work together to lock the party out of power.

All this is not to suggest that independents are experiencing a sustained renaissance: they almost certainly aren't because their historic strength was linked to political parties not challenging them. Nonetheless, in areas where one party is very dominant, independents are often the means by which that party can be successfully challenged. Likewise, if opposition parties have not managed to convince voters of their electability but they still wish to vote against the Conservatives an independent candidate is an attractive option.

1995 was the worst set of local elections for the Conservatives ever. But they actually lost even more councils in the 1996 set (which weren't quite as bad in vote terms) because councils that elected by thirds had by then inflicted two years of bad results on them. History may repeat in 2024 when very many fewer councils will elect. Councils like Redditch and Tamworth in which Labour won a clear majority of seats this year, but which sustained the Tories because they did far better in the 2021 and 2022 cycles, will fall if next year's results are anything near as bad as 2023.

Worse, the seats up next year are from that coterie that the Conservatives did very well in after lockdown ended in 2021. Even if the parties end up neck and neck in next year's national equivalent vote (which would be a marked improvement on this year's performance) that would represent a 5% swing from the Tories compared to 2021. And a 5% swing would cost the Conservatives a lot of seats and even more councils. And parity with Labour, even in local elections, still seems a long way for Rishi Sunak.

Map of councils controlled 2023

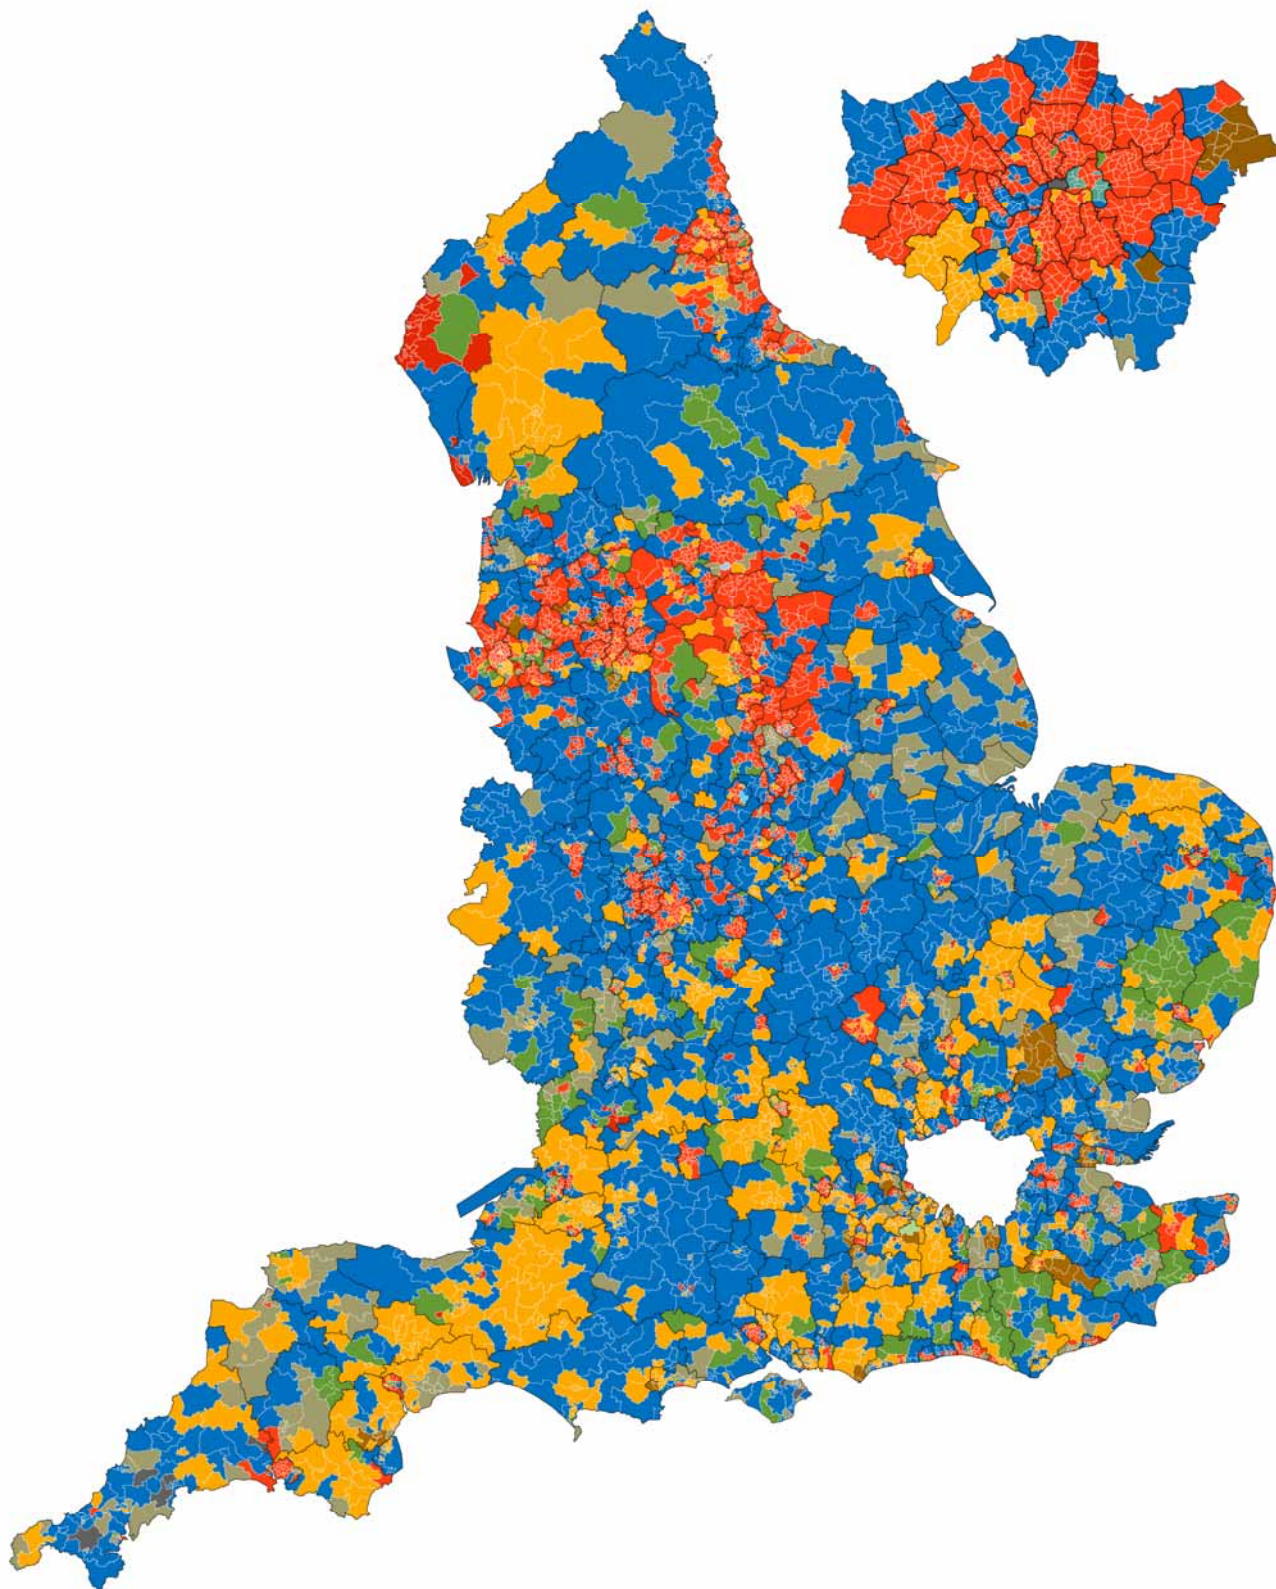

Faded colours indicate party colours of councils not up for election this year. M = directly elected mayor. Grey denotes no overall control.

The dot shown on all councils under no overall control denotes the largest party. It does not mean that party adminster the council as a minority or in coalition.

2023 ward map

including councils that did not elect this year. In split multi-member wards the party holding two of the three seats; or in two-member wards the party topping the poll, is shown

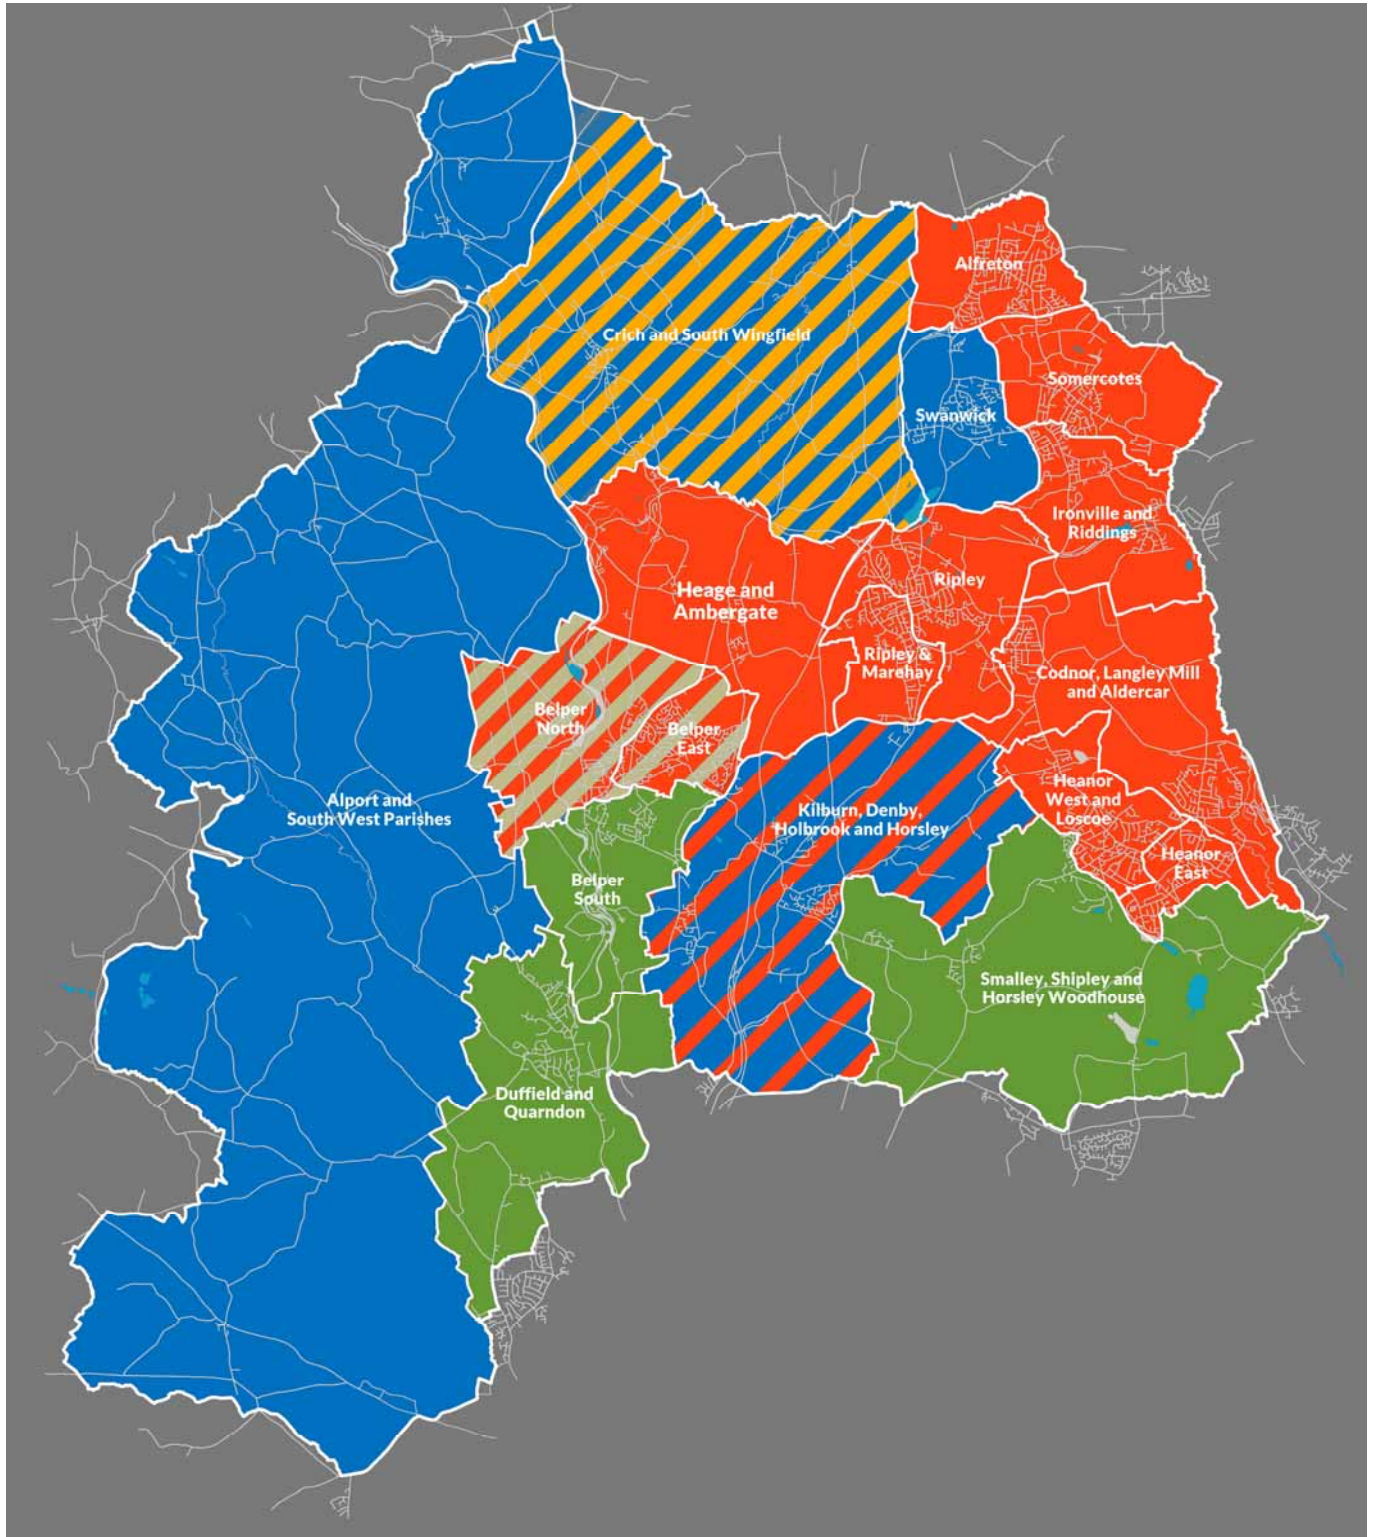

Amber Valley

boundary and council size changes

Labour gain control from Conservatives - majority: 10 seats
