What a difference a year makes

Remember a time before Partygate? There was one. In May 2021 the United Kingdom was re-opening after more than a year of stop-start lock-downs, huge numbers of deaths from Covid, an Eat Out To Help Out summer of 2020, weekly claps for the NHS and the most successful vaccine roll-out in Europe.

Though there were still some voices - notably Jeremy Corbyn's brother Piers - peddling wild conspiracy theories about the vaccines, by spring 2021 a very large majority of the population had received three doses of it: the two initial injections, six weeks apart, and a booster.

The success of Britain's vaccination programme: the creation of the first Oxford-AstraZeneca vaccine, our effective roll-out of the drug and the return of most individual liberties denied us during lock-down led many to ascribe the comfortable Conservative Party opinion poll leads in the run-up to the May local elections as "Boris's vaccination bounce".

The election results last year were among the best for the Conservatives in two decades; up there with David Cameron's big haul of council seats at the local elections that coincided with the 2015 general election, and the 2017 county council results that led Theresa May into the catastrophic decision to call a general election that year, eradicating the Conservative majority and leading to two turbulent years of a Remain-supporting parliament doing everything it could to wreck the Brexit referendum result. So good was the 2021 result for the Conservatives that a lack-lustre candidate running a lacklustre campaign for mayor of London came far closer to unseating Labour incumbent Sadiq Khan than anyone realistically expected - certainly than any polls suggested.

The consequence was that, in the twelfth year of Conservative or Conservative-led government, the Tories held 7,562 councillors to Labour's 5,849 and the Lib Dems' 2,487. In comparison, in 1991 - the last time the Conservatives had been in power nationally for a similar period, there were 9,507 Labour councillors and 7,984 Conservatives (3,668 Liberal Democrats). The National Equivalent Vote forecast for 2021 was Conservatives 39%, Labour 30% and Lib Dems 13% - 30% being lower than Labour won in the 2019 general election under Jeremy Corbyn (though the big parties generally poll lower shares in local elections compared to general elections because more votes get cast for the Lib Dems, other small parties, independents and residents association candidates).

The Conservative high didn't last long: just over a month later the Liberal Democrats won the Chesham and Amersham by-election, this Buckinghamshire seat becoming vacant following the death of former Conservative cabinet minister Dame Cheryl Gillan. The 17th June by-election produced a 25% swing to the Lib Dems in a constituency deeply disrupted by the High Speed 2 rail development and that is estimated to have voted 55% Remain in the 2016 EU referendum.

Two weeks later the Conservatives also failed to gain the "red wall" constituency of Batley and Spen in West Yorkshire despite (or maybe because of) the intervention of George Galloway in a by-election caused by the resignation of local MP Tracey Brabin who had been elected as West Yorkshire regional mayor in May. Galloway polled strongly in heavily-Muslim Batley: usually the core of Labour's vote in the constituency. But the prospect of having the flame-throwing, populist left-winger as their MP appears to have encouraged voters in the rest of the constituency, usually much more strongly Conservative, to vote Labour - and this enabled Kim Leadbetter, the sister of former Batley MP Jo Cox, to hold the seat. Conservatives were criticised for running a very low key campaign.

Campaign posters on a lamp-post, June 2021 Batley and Spen by-election

Yet for all the national optimism at the lifting of restrictions on movement, work, socialising and normal life in general, lockdown had created significant social and economic problems, relatively hidden when everyone was confined to their homes but becoming evident as the country's cogs began grinding again.

A government that, for all its spin had never got the public finances in order despite a decade of so-called austerity (in not one of those years did government income exceed spending - hence the national debt kept growing) spent billions on schemes like furlough that kept locked-down workers off unemployment benefits, and the Bank of England printed billions more in "quantitative easing" injecting vast amounts of liquidity into the market, just as the US Federal Reserve and, to a lesser extent, the European Central Bank were doing too.

Seemingly, monetarist economic theory had no subscribers any longer at the Bank, nor the Treasury: either the masters of our economy had genuinely fallen for their own spin that they had permanently conquered inflation or they were far more influenced by the new left-wing economics that asserted that nations with central banks can fund any scale of redistributive service provision through printing money without any impact anywhere else on the economy. Besides, what other choice did the government have to ensure its non-working citizens did not endure penury?

The other consequence of a post-lockdown world was the economic stresses of reopening. Sudden renewed demand for goods and services was met by insufficient elasticity in the market and - as serious - gigantic supply chain problems as hauliers and shipping companies dashed to rehire drivers and dockers, merchant navy personnel, pilots and farm-workers. Basic economics teaches us that when demand outstrips supply, wages rise as employers compete for labour. That is also another source of inflation.

This stoked yet another absurd Brexit-cipher argument with former Remainers claiming that Britain's shortage of hauliers and farmers, and the surging costs of everything was down to Brexit rather than the reopening of our economy. To the extent that some of the EU migrant labour workforce had returned to their native countries during lockdown and Britain had now curbed free movement from the European mainland, there was a modicum of a point.

But while the best misinformation has a grain of truth at its heart, the Remainer claim was still largely nonsense. If labour shortages were down to Brexit, why did Spain, Germany and Poland also struggle to find hauliers? Why did the US have problems sourcing supplies? And as for the claim that companies were being forced to pay higher wages - well, most Brexiteers would plead guilty to that being a consequence of leaving the EU. Better a country where work pays than much of the electorate dependent on big state handouts of the sort Labour introduced.

The inflationary warning signs pinged up throughout late 2021: in September the Consumer Prices Index (CPI) leapt from 2% to 3.2%; by November it was 4.2%. Gas prices surged - another example of inflationary pressure on a reopening global economy. The first of many "all-time highs" for gas prices shortly followed. The unprecedented surge in prices prompted a wave of panic petrol buying in October but, more consequentially, exposed both the government's lack of gas storage as winter approached and the failure of several generally smaller energy companies to purchase significant reserves of energy. When they were forced, approaching the colder months to buy extra supplies at the very much higher rate, the energy price-cap prevented them from passing the additional costs onto bills, bankrupting them.

This had three consequences, some of which we are yet to fully experience. The first essentially ended the energy market by so narrowing the range of providers that competition on price vanished. Long term fixed rate energy deals either disappeared entirely, or were set so much higher than the price cap that no-one with any price-consciousness would opt for them.

The second was to expose the shortcomings of a price-cap model, urged upon the government by Labour and finally adopted by Theresa May. The price cap, only adjusted by the energy regulator Ofgem twice a year at that point, was raised from £1,277 on average in August 2021 to £1,971 in April 2022 - and this prior to any consequence of Russia's invasion of Ukraine.

Probably the most profound long-term consequence of the surge in prices was that this represented a third massive economic trauma to a country not really close to recovered from the first: the 2008 financial crash, let alone the second: the pandemic.

These economic challenges gave Labour's critique of government economic policy something of a wider airing among the public - but one of the somewhat surprising features of this parliament has been the lack of visibility the official opposition has had and the lack of impact it has made on the policy debate, in no small part because the party avoided making many policy pronouncements. They scored a minor hit - but probably mainly only among those already sympathetic to their cause - by opposing the ending of the £20 a week Universal Credit uplift that then Chancellor Rishi Sunak had introduced to help with the economic turbulence of Covid lockdowns.

They certainly had more impact than criticism of the UK's chaotic withdrawal from Afghanistan in August 2021, forced upon us by US President Joe Biden's unilateral and barely forewarned decision to pull his armed forces from the country in a matter of days. Whatever the degree and legitimacy of criticism of the government's response and the leaving behind of Afghan interpreters at high risk of retribution by the returning Taliban regime, issues of foreign affairs generally need to be of significantly greater direct impact on the British electorate for them to shift opinion polls.

This cuts both ways: the Conservatives received negligible improvement in the polls over Boris Johnson's grandstanding as the champion of Ukraine, perhaps not least because he was hardly out on a limb in siding with this invaded European nation over Russia - almost anyone else in parliament, bar perhaps Jeremy Corbyn, would have backed military support being sent.

But there was another reason Boris Johnson got no polling uplift from Ukraine, and that was sleaze. The direct beginning of the episode that would bring the Prime Minister down occurred in October when the Parliamentary Standards Commissioner reported on the saga of former cabinet minister Owen Paterson.

But the incident that primed the problems Boris then disastrously ramped-up occurred beforehand, in June 2021, when Health Secretary Matt Hancock was exposed having an affair with a married aide, having been caught on CCTV cameras he wasn't aware existed in his office. The principal problem here was not the affair per se despite its resurrection of John Major's "Back To Basics" disasters prior to the 1997 general election. Rather it was that the country was still in lock-down at the time the CCTV was recorded. It was an example of Conservative ministers legislating to lock down the country and keep loved ones apart, and then flouting the rules when it suited them.

Five months later, Owen Paterson had been censured for lobbying for companies in his constituency without declaring the remuneration he had received from them. Suddenly, Boris Johnson decided that Conservative MPs should reject the Commissioner's findings, which would otherwise have led to a suspension from the Commons for thirty days and a recall petition that would almost certainly have triggered a by-election.

MPs were whipped to vote the recommendations down and opt instead for a pause while the standards procedures (which Paterson had asserted afforded him no due process) were reviewed. Despite having a majority of 80, the report was rejected by just eighteen votes: 250 to 232. Having sustained the damage of being seen to defend an apparently corrupt MP, the very next day Conservative MPs discovered that Johnson had decided overnight to abandon Paterson, who subsequently resigned as an MP.

This episode eradicated the Conservatives' lead in the polls. A ComRes poll carried out in the aftermath of the Paterson saga put Labour on 40% (up five points on their previous poll right before the u-turn) and the Conservatives on 34 (down four).

The North Shropshire by-election campaign, with the vote scheduled for 16 December, was a miraculous example of everything going wrong for the Conservatives. Set aside the dreadful reason for the unnecessary vote and the fact that the Tories selected a non-local (albeit that he was only from Birmingham); on 8 December, government spokeswoman Allegra Stratton tearfully resigned over a

leaked video clip showing her joking with fellow Downing Street spin doctors about an alleged Downing Street lockdown party a few days earlier.

The next day the Conservatives were fined by the Electoral Commission for failing to declare donations from a party financier who funded renovations to Boris and Carrie Johnson's Downing Street flat, the pretentious opulence of the decorations again speaking directly to the Prime Minister's apparent belief that he simply didn't need to comply with the rules the rest of us are made to live by.

signed up to yet more restrictions, especially on New Year's Eve. Hogmanay was cancelled - again.

Partygate dragged into 2022, the Prime Minister following a typical pattern of denying all knowledge of any alleged wrongdoing, evidence coming to light that he either knew of or participated in it, him going to the Commons and "profusely apologising" for the "mistake" he had made, and then continuing on as if this made everything alright.

The same day, a civil service investigation into the Downing Street lockdown party was widened to look into three further social gatherings.

On 12 December further media reports, including photos of Johnson at a Downing Street Christmas Quiz in 2020 were published. On 15 December, inflation was reported to have reached 5.1%, and on North Shropshire polling day itself the Bank of England raised interest rates in a belated attempt to rein this surging inflation rate.

The Conservatives lost North Shropshire on a 34% swing. The loss was not cathartic; it did not draw a line under the blunderingly stupid mistakes made by the Prime Minister - indeed, the revelations of apparent lockdown breaches kept on coming over Christmas and into the new year.

All this while Conservative backbenchers became increasingly frustrated by the risk aversion of the scientific advice over Covid which was pressing for a further lockdown over Christmas 2021 to curb the much more infectious, but far less life-threatening Omicron variant of Covid. Such was the unease on the Tory backbenches that the government was increasingly having to rely on the votes of Labour and SNP MPs to pass extensions of Covid emergency powers - the opposition parties without fail being even more in favour of restricting civil liberties than Boris Johnson.

The clash between the official advice on Omicron and cabinet members' reluctance to impose deeply unpopular restrictions on Christmas celebrations after months of telling the country it was time to "live with Covid" crystallised with the resignation of Conservative EU negotiator Lord Frost on 18 December, principally over Johnson's dithering but on a somewhat wider range of disagreements with government policy - principally the fervour by which it was pursuing Net Zero and higher taxes. The resignation appeared to stiffen sinews within the cabinet and an open, unrestricted Christmas ensued - in England at least. The devolved administrations in Scotland and Wales

But the country was not as ready as he was to move on. On 14th January alone four different newspapers reported on four entirely different new Partygate revelations and on 19 January Bury South Tory MP Christian Wakeford defected to Labour. Allegations of aggressive whipping to suppress Conservative anger at Johnson's continued failure to come clean on Partygate surfaced and the first announcements were made by the Metropolitan Police that they were investigating alleged breaches of the law in respect of events in Downing Street.

By this time the decline in Conservative electoral fortunes were becoming baked-in among voters, many of whom were now speaking up about the sacrifices they made during lockdown while ministers and staff were seemingly partying away. As the journalist-bloviator Julia Hartley-Brewer - hardly the voice of the woke liberal left - put it on BBC Question Time: "*I don't think we should ever be ruled by people who think they're better than us and know better than us. And I'm afraid [Boris Johnson] has to go because we should have principles in government that if you lie to parliament; if you make laws that you then break, you have no business being in charge of this county*"

The government's woes were not just confined to Partygate. Lord Agnew, a Treasury Minister, resigned over not only the failure, but the lack of interest in even trying to recover millions lost to Covid fraud.

Opposition leader Keir Starmer was threatened by a mob outside parliament over essentially false claims perpetuated by the Prime Minister that he had done nothing to prosecute paedophile Jimmy Saville when he was Director of the CPS. This incident occurred just days before the Southend West by-election caused by the murder of Conservative MP Sir David Amess, stabbed to death at a constituency advice surgery, again raising concerns about politicians agitating a potentially violent fringe element of society in the way Donald Trump did in the United States.

Buried amongst this ceaseless run of bad news came the announcement that, in 2021, Britain's economy had grown by 7.5% - the largest rise since 1941, though still not getting us back to where we were in 2018 before the pandemic. Largely lost because Boris Johnson simply could not behave in a way suitable for a Prime Minister and didn't even seem to appreciate that nationwide disgust at his misconduct was not manufactured by Labour, Lib Dem and SNP MPs, plus those Conservatives who'd never wanted him to lead their party in the first place.

In late January, the first rumblings of an intention by Russia to invade Ukraine to oust the pro-west, pro-NATO and pro-EU democratically elected government of Vladimir Zelensky. UK and US intelligence agencies collaborated to release a series of briefings demonstrating that mass build-ups of Russian forces along the border with Ukraine were not likely to be posturing but were the real deal, building on the 2013 annexation of Crimea and formalising the pro-Russian regimes in the breakaway regions of Lukhansk and Donetsk.

Despite snorts of denial by Russian Foreign Minister Sergei Lavrov over any invasion plan, Russia stormed Ukraine on 24 February setting off the events that are many months, maybe years, from resolution as I write this introduction.

As I suggested earlier, it takes a great deal for a foreign affair, even a war in Europe, to take on a party political dimension at home, not least because the parties tend to stand broadly together. There is no Labour position on Ukraine that substantively differs from the Conservative position. Only a tiny fringe of journalists and independent MPs are even trying to make the case that we should not be supporting Ukraine or that Ukraine is insufficiently important a democracy to merit the risk of Russia attacking us in retaliation.

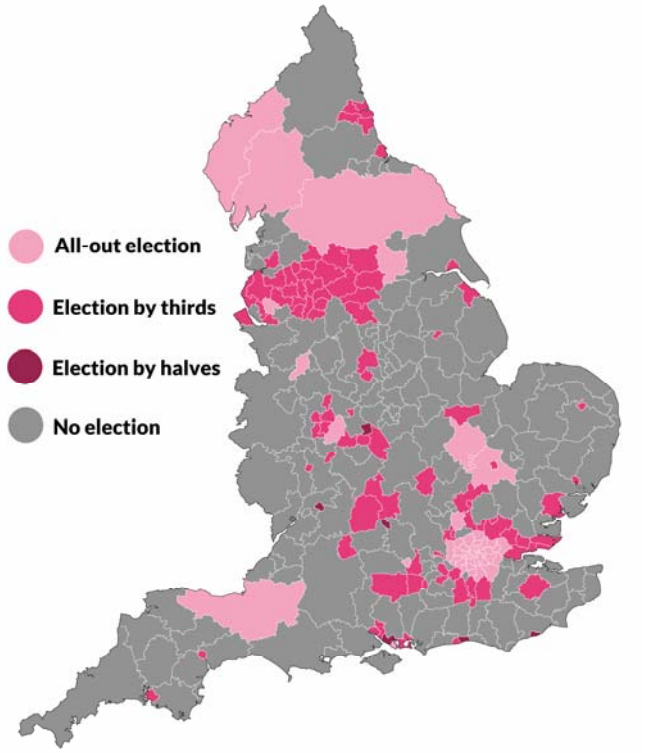

Nonetheless, I have already documented the domestic economic pressures that were driving up inflation and other costs for UK consumers and businesses, and the Ukraine war turbo-charged these problems, as Ukraine ceased being able to export its critical foodstuffs and sanctions made Russia disinclined to export its gas and oil to the west.

The government responded to the growing cost of living crisis by cutting fuel duty by five pence per litre, though this took time to be passed on by garages - if they did so at all. Having also made some contributions through universal credit and council tax reduction grants, the government also pledged to provide a minimum of £400 and up to £1,200 in October 2022 when the price cap is next to increase. Even consumer champion Martin Lewis admitted that the government had gone further to help than he had expected.

The problem was that few were in the mood to give Johnson any credit for anything anymore. Anyway, this was just an announcement: hard cash was not going to appear in anyone's energy account until the autumn. So the polls did not shift, Labour maintaining around an 8% lead over the Conservatives. When the council seats up in May were last contested in 2018, the Conservatives were notionally 1% ahead in the popular vote. So a 4.5% swing to Labour was suggested. A far cry from the Conservative rout just one year earlier.

The 2022 battleground

Beyond London the councils and seats up for election this year was almost identical to those up last year in those areas that should have held elections in 2020 but which were postponed during the pandemic.

Councils with seats up for election in 2022: lighter shaded authorities being councils with all-out elections, darker-shaded being councils that elect by halves and mid-shaded by thirds

In addition to those councils electing by thirds, and a second year of the smaller number that elect by halves, the Local Government Boundary Committee for England (LGBCE) and the government slotted in several "new" or reconstituted county councils that have been turned into unitary authorities. These were two new councils for Cumbria: Cumberland and Westmorland and Furness, North Yorkshire and Somerset.

Already within this "spoke" in the electoral cycle were all-out district councils Huntingdonshire, Newcastle under Lyme and South Cambridgeshire, plus the biggest council of all: Birmingham.

Following a highly critical inspection of Liverpool City Council by government commissioners, which recommended that councillors be more accountable to their electors by representing smaller, single-member wards (similar to the findings a few years earlier for Birmingham City Council), elections to that council were cancelled and a boundary review undertaken by the LGBCE. Elections to Liverpool will resume in 2023 but, again like Birmingham, from that point on it will have all-out elections in the belief that this will enable councillors to govern rather than constantly need to focus on campaigning for next year's vote.

Neighbouring St Helens council also underwent boundary changes this year and will now move to all-out elections.

Nominations: a "progressive alliance" conspiracy?

The Conservatives made something of a brouhaha about the number of seats Labour and the Lib Dems did not seek to contest at these local elections, alleging a covert - and implying an illicit - electoral pact to compel all non-Conservatives in certain wards to rally behind a sole alternative, thus maximising the chances of defeating the Tory candidates.

On the face of it - and probably more than just on the face of it - there does seem something to these allegations though both Labour and Lib Dems denied them strenuously. Well, they would wouldn't they? Beyond a few activists constantly whinnying about a so-called "progressive alliance" the voters tend to dislike what they might regard as political gamesmanship.

Year	Con	Lab	LD	Grn	Ind
2022	96.1	88.4	69.7	53.4	15.7
2021 *	97.6	93.4	74.0	60.0	26.2
2019	95.8	77.0	52.7	31.1	21.6
2018	99.4	98.3	73.6	50.7	14.2

Proportion of council seats in England (exc. London) contested by the four largest parties plus independents. *2021 figures combine the councils meant to be up for election that year and the county councils that should have elected in 2020 but which were postponed due to the pandemic

Looking at the proportion of seats contested at these elections we can see that Labour contested 88% of English council seats compared to 98% in 2018; while the Lib Dems stood in 70% compared to almost 74% in 2018. While Labour has reported losing a hefty chunk of members since Jeremy Corbyn's departure as leader, surely this could not account for them contesting so many fewer seats this year? After all, Labour managed to stand candidates under pre-Corbyn leaders when membership was even lower than it is reported to be today.

The Conservative press releases complaining about this claimed Labour was vacating the field in "the south west" while Lib Dems were absent without leave in much of the midlands and north. Things are a little less clear. For example, only three South Western councils elected this year and Labour stood full slates in two of them: Plymouth and Exeter. No, the Conservatives were specifically referring to the new Somerset Unitary Authority where, indeed, Labour did not come close to fielding a full slate of candidates: just 45 for 110 seats.

In this case it is far from clear the Conservatives have a point and, even if they do, that it had very much at all to do with the Tory loss of Somerset to the Lib Dems. Somerset is one of the very weakest areas of the country for Labour and the party would genuinely have struggled to field candidates for all 110 seats - more than double the membership of the outgoing Somerset County Council. If Labour failed to stand in Wells or Glastonbury or Exmoor or the Mendip Hills that may well be down to a shortage of willing local members to put themselves forward.

But even if it was a dastardly conspiracy with the Lib Dems - maybe even the Greens, Labour gets so derisory a vote in these areas that their absence would make little difference. The reason the Tories got routed in Somerset was because of a direct 16.2% swing from Conservative to Liberal Democrat - and if you want a reason for that swing, look to 10 Downing Street, not the Somerset Labour Parties.

Likewise, the Lib Dems are even weaker in most of the Midlands than Labour is in Somerset. That said, there were only two Metropolitan districts in which the Lib Dems did not contest a single seat: Tameside and South Tyneside. Both Labour strongholds but it is the very fact that they are that explains the Lib Dem absence: neither has ever been a hotbed of support for that party; the Lib Dems routinely fail to contest seats.

This is not to say there were is no evidence to substantiate the Conservative claims of electoral pacts. It's just very hard to know for sure: not least because the voters also have a part to play in these outcomes. In Cumberland, for example, the Tories lost seats in all directions: to Labour, Lib Dems, Greens and independents. In some of these wards that changed hands there was indeed only one alternative to the Conservatives standing. But in others there was a wider field and the Conservatives still lost: because those voters who wanted to kick the Tories hard worked out for themselves who was best placed to defeat them.

There was also an element of this choice being self evident. Labour, for example, is highly unlikely ever to win an affluent suburban semi-rural ward like Belah on the outskirts of Carlisle, or the massive rural ward of Bothel and Wharrels - but it's classic territory for a Green insurgency - and they gained both despite not having the non-Conservative vote to themselves.

Likewise, in the urban areas Labour burst back to dominance in, this had far more to do with the collapse in a formerly strongly anti-Labour independent grouping throughout Maryport and Workington, for example, than a tactical vote against the Conservatives who have never been competitive in these staunchly working class areas.

So, though a certain degree of parties co-operating might be detected in the Cumberland results, there are alternative explanations for the Conservatives' heavy losses. And, just like in the dog days of the deeply unpopular John Major government prior to Labour's 1997 landslide, the voters are more than capable of working out how to inflict maximum damage on the government. They did so here and the Conservatives should be seriously worried as all three parliamentary constituencies: Carlisle, Copeland and Workington are so-called "red wall" seats.

There are, in fact, very few local government wards where parties can orchestrate a "progressive alliance" because, by and large, voting patterns in the vast majority of divisions are entrenched: there aren't many three- or four-way wards even in three- or four-way councils like Colchester, Milton Keynes, Birmingham or Sunderland. And in all of these councils, there is healthy party competition: no tactical withdrawals to see here.

Nonetheless, with the media obsessing about red wall versus blue wall seats and the quite different challenges facing the Conservatives in each - and with party activists becoming quite desperate to turf the Tories out of government nationally any sign of the re-emergence of tactical voting is going to be seized on. But tactical voting and electoral pacts are two quite different entities. There's plenty of evidence of the former in these elections but evidence of the latter is much more scarce.

The headline results

Comparing council election results from year to year is a little problematic for two reasons. Firstly, in each stage of the cycle different councils are up for election. The councils fought in 2022 are not precisely those that were contested in 2021 - most are, but a few aren't. And some get taken out because of boundary changes, or because they shift from annual elections to a four yearly cycle: Liverpool did not elect this year for example.

The second problem is: what are we comparing with? Strictly speaking, the 2022 elections should only be bench-marked against the 2018 elections: the last time these specific seats were last contested. But, while comparing with the 2021 elections is not as robust for the reasons above, there is still a degree of relevance - of interest - in comparing with how the parties fared just one year ago.

In so doing, however, you create an element of wriggle-room in which politicians flourish. Labour very much do not want us to pay as much attention to comparing 2022 with 2018 because - believe it or not - there was a swing to the Conservatives this year compared with 2018. It was a "negative" swing in that Labour's vote fell more than did that of the Conservatives, but it was a swing nonetheless. Equally, the Conservatives would want less comparison made between 2021 and 2022 because, on that measure, they fared considerably worse (though not as badly as their seat differentials suggest).

	Votes	%	2018	2021
Labour	1,945,889	36.3	- 4.2	+ 1.4
Conservatives	1,652,221	30.9	- 2.1	- 4.3
Liberal Democrats	934,088	17.4	+ 3.2	+ 4.0
Green	454,340	8.5	+ 3.0	- 0.9
Independents	194,344	3.4	0.0	- 0.6
Others	174,556	3.3	- 0.1	+ 0.1

The results in England excluding London. Including London, the vote shares were Labour 38.1%, Conservative 29.4%, Lib Dems 16.5%, Greens 3.0%, Independents 2.4% and Others 3.5%

The third problem with these results is that not everywhere votes each year. This is less of a problem comparing 2022 with 2021 or 2018 because the London results are analysed separately so, basically, the same councils elected in all three years. Comparison is possible.

But the councils that do elect have a fairly significant Labour lean to them: most of the huge metropolitan districts, covering England's big cities, plus unitaries that cover smaller cities and large towns in the main. The Conservatives are more competitive here but they are still somewhat more Labour than the scores of all-out non-metropolitan districts that don't elect until next year. That's not to say there aren't strongly Conservative voting areas mixed in with these larger towns and cities: just that they are up against far more strongly Labour-supporting local authorities.

Nonetheless, Labour "won" these local elections pretty clearly, as they did in 2018 but not 2021: they finished second last year by 0.3%. That, by the way, gives a measure of the Labour lean of these particular councils: 2021 was a dreadful election year for the party: the National Equivalent Vote (NEV) that aims to straighten out the lean in any given set of elections projects that the Tories would have won 40% if every council had voted, and Labour 30%.

This year Labour were five points, or about 300,000 votes, clear of the Conservatives. And that despite a couple of pretty inhospitable new councils: North Yorkshire and Somerset, being added to the mix and Liverpool, one of the best for Labour, not electing. On the other hand, the country's largest council: Birmingham, was up this year and not last, and both Doncaster and Rotherham elected in 2021 but not 2022. In other words there are swings and roundabouts in each set of elections: the different cycles offset each other, generally.

Gains and losses

Conservative gain

- Newcastle under Lyme (from no overall control)

Labour gains

- Crawley (from no overall control)
- Kirklees (from no overall control)
- Southampton (from Conservatives)
- Worthing (from Conservatives)

Liberal Democrat gains

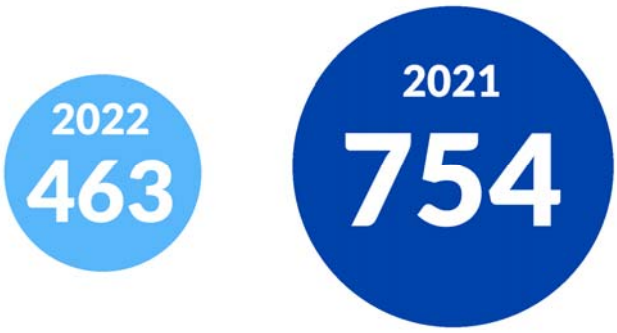

- Gosport (from Conservatives)
- Kingston upon Hull (from Labour)
- Somerset (from Conservatives)
- Woking (from no overall control)

Councils falling to no overall control

- Castle Point (from Conservatives)
- Hastings (from Labour)
- Huntingdonshire (from Conservatives)
- Hyndburn (from Labour)
- West Oxfordshire (from Conservatives)
- Wokingham (from Conservatives)
- Worcester (from Conservatives)

A plague on all your houses

These elections were not impressive for any party. For the Conservatives they represented a big reversal from the 2021 results, a loss of seats - principally to Labour - over 2018 even though there was a relative swing to the Tories from Labour from that year.

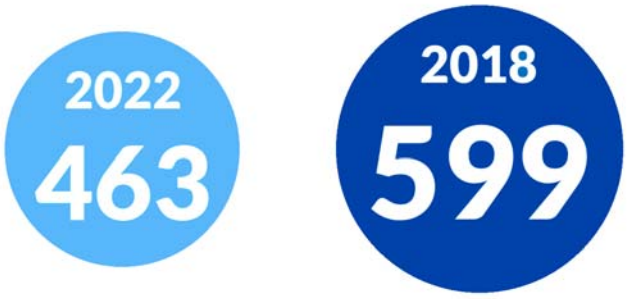

They have significant problems in specific areas, especially Surrey. But these elections were not especially damaging to them - certainly not in the country beyond London. They still advanced, or maintained previous progress, in councils covering "Red Wall" areas like Amber Valley, Bolton, Hartlepool, Hyndburn, Dudley, Walsall and Nuneaton

& Bedworth. They even gained Newcastle under Lyme, in their increasing stronghold of Staffordshire (though they were narrowly outpolled by Labour in that town's parliamentary constituency).

But the graphic above illustrates how much worse the Conservatives fared in the ninety-seven councils that had directly comparable elections this year as last (the councils electing by thirds or halves).

The like-for-like comparison with 2018, rather than 2021, is only somewhat more encouraging for them:

If there was a swing from Labour to Conservative and yet the Tories came out of the election with losses to Labour, is this more evidence of what we speculated about in the nominations section earlier: a return of tactical voting to disproportionately hurt the governing party? There's almost certainly some of this going on - but there's very little evidence of it being any more consequential than in any mid-term local election ever. It cannot even be measured against the scale of tactical voting that occurred in the run-up to the 1997 general election and produced that catastrophic election defeat.

Let's recognise that these results, while hardly great for the Conservatives, were no electoral disaster for them either: in no small part because Labour failed to impress as well - directly because of the ongoing realignment of the Midlands and some of the North away from that party. The Tories didn't really fare that badly, especially given the level of voter fury that the news media told us consistently was out there at Partygate and government failures to deliver.

There are three more consequential factors that explain the Conservative losses - and they're all linked. Firstly, in swathes of the country where Labour is the Conservatives' principal challenger - and especially in the smaller cities and large towns: Plymouth, Portsmouth, Southampton, Milton Keynes, Swindon, Southend - many wards are balanced very finely and the slightest change in national popularity can shunt them from one side to the other. The Conservatives lost around 7 of every 10 of these marginals this time; last year they won getting on for 8 out of 10 of them.

Second, wards do not behave in the same way. We saw in London, especially, that the Conservative losses were far worse than the London-wide vote might have indicated because the Tories fared worse in their marginal and safe wards, while performing very much better in safe Labour wards where their improvement (or substantial Labour decline) went largely unnoticed. Very safe Labour wards became merely safe - but what matters ultimately is who wins. A similar, though far more muted version, of this phenomenon happened in the country beyond London too.

Third, as well as that Labour to Conservative swing, there was a much larger Conservative to Liberal Democrat swing. That was most obvious in the big Conservative-Lib Dem battlegrounds: Somerset, Westmorland and Furness, St Albans, Woking and Wokingham for example. But far smaller improvements in the Lib Dem vote in some Labour-Conservative battlegrounds could also have helped tipped marginal wards away from the Tories, even where Labour was struggling to get its vote out.

The Conservatives also "lost" the vast majority of the constituencies they gained in 2019, again only in those councils electing this year where their votes can be tallied to a high degree of accuracy. Ironically, in London where Conservatives suffered far bigger losses than the rest of England, the party was only outpolled by Labour in three constituencies that they held in 2019 (the three in Barnet) - while outpolling Labour in two they did not win then: Enfield Southgate and Croydon Central. Yet in England beyond London the Conservatives were outpolled by their principal opponent in scores of marginal (and some not so marginal) seats, albeit in many cases not by very much and on very much lower turnouts.

This list above shows some of the key marginal Conservative-held constituencies, which party led the votes in the wards comprising the seat this year, and by how much they led. An asterisk against the constituency name means the Conservatives were in third place this year, and a percentage against the name shows how much of the constituency elected this year - where not every ward was up.

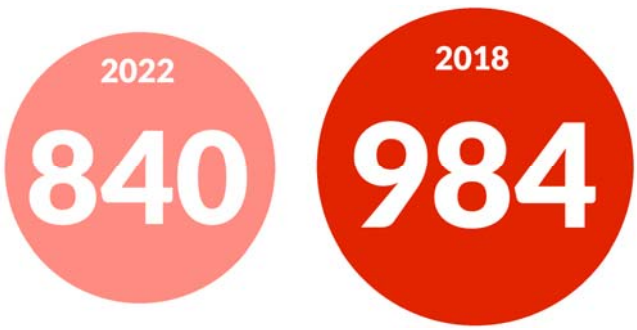

The Conservatives also were outpolled in the following constituencies that are not considered marginal:

Gosport	LD lead	0.5%
Penrith and the Border	LD lead	6.4%
Somerton and Frome	LD lead	8.3%
Taunton Deane	LD lead	18.2%

It should also be remembered that the Conservatives routinely lose local elections in many of these constituencies (especially those where they face the Lib Dems) and then win general elections in the comparable constituencies, often handily. Nonetheless, these results should send a message loud and clear to any Conservative MP sitting on a small majority that, however much Boris Johnson may or may not have been an electoral asset in 2019 his allure had well and truly vanished by 2022 - and, given how tarnished he had become for many swing voters, probably never would have regained it.

Labour

These notional wins in marginal constituencies may, superficially, seem to bode well for Labour. But Labour's lead in these constituencies was, in many cases, unimpressive - and founded on a vote share of just 36%. And, to put into context quite how mediocre Labour's performance was, the party led by the supposedly more appealing Sir Keir Starmer polled four percentage points worse, and won 144 fewer council seats in the like for like councils than the party led by factional and divisive Jeremy Corbyn in 2018.

This may be the major emerging problem for Labour: the failure to convince Conservative-leaning voters to support them in great numbers (and remember, Labour needs great numbers to return to the fold to fix their 2019 general election disaster) whilst giving little reason for those inspired by the more left-wing party of Corbyn to remain loyal.

If you look at the list of council seat gains and losses further inside the vast majority of Labour gains came from Conservatives. But they lost almost as many as they gained - and that list of losses is to all comers: seats lost to the Tories in the red wall but also to the Greens (especially in the Mets), to residents groupings and independents, and to the Lib Dems.

We do not appear to be in an era, at least as far as local elections are concerned, where Labour can afford to ignore what some would consider its core vote while focussing on swing voters who backed the Tories last time. Some of its so-called core seem to be quite happy to migrate elsewhere. They may return at a general election but, given that Starmer seems to be going out of his way to find ways of annoying the left of the party in order to demonstrate how much more mainstream a politician he is, they may not.

The way he is picking fights: banning MPs joining strikers' picket lines, reneging on the left-wing pledges he made when running for leader, barring Corbyn from the parliamentary party and sacking left-leaning MPs from his frontbench seems an order of magnitude different from the way Kinnock, Smith and Blair regained the party from the left in the 1980s and 1990s. Then they were simply ignored and gradually faded away, both from parliament and in the constituencies.

Today the left is a far larger and younger presence in the parliamentary party than in the era of Tony Benn. Moreover, Kinnock, Smith and Blair were more substantial politicians with far deeper roots in parliament and the party. Starmer became leader after just one term in the Commons. Kinnock had been an MP for 13 years before he won the leadership; Smith for 22 years, Blair 12 years and Brown 24. They were more secure in their leadership of it. Parliamentary politics has speeded up: politicians can reach the peak of their careers in the Commons in a decade or less these days - but perhaps there is something to be said for having a longer track record of service in government and opposition: it adds confidence, experience and gravitas.

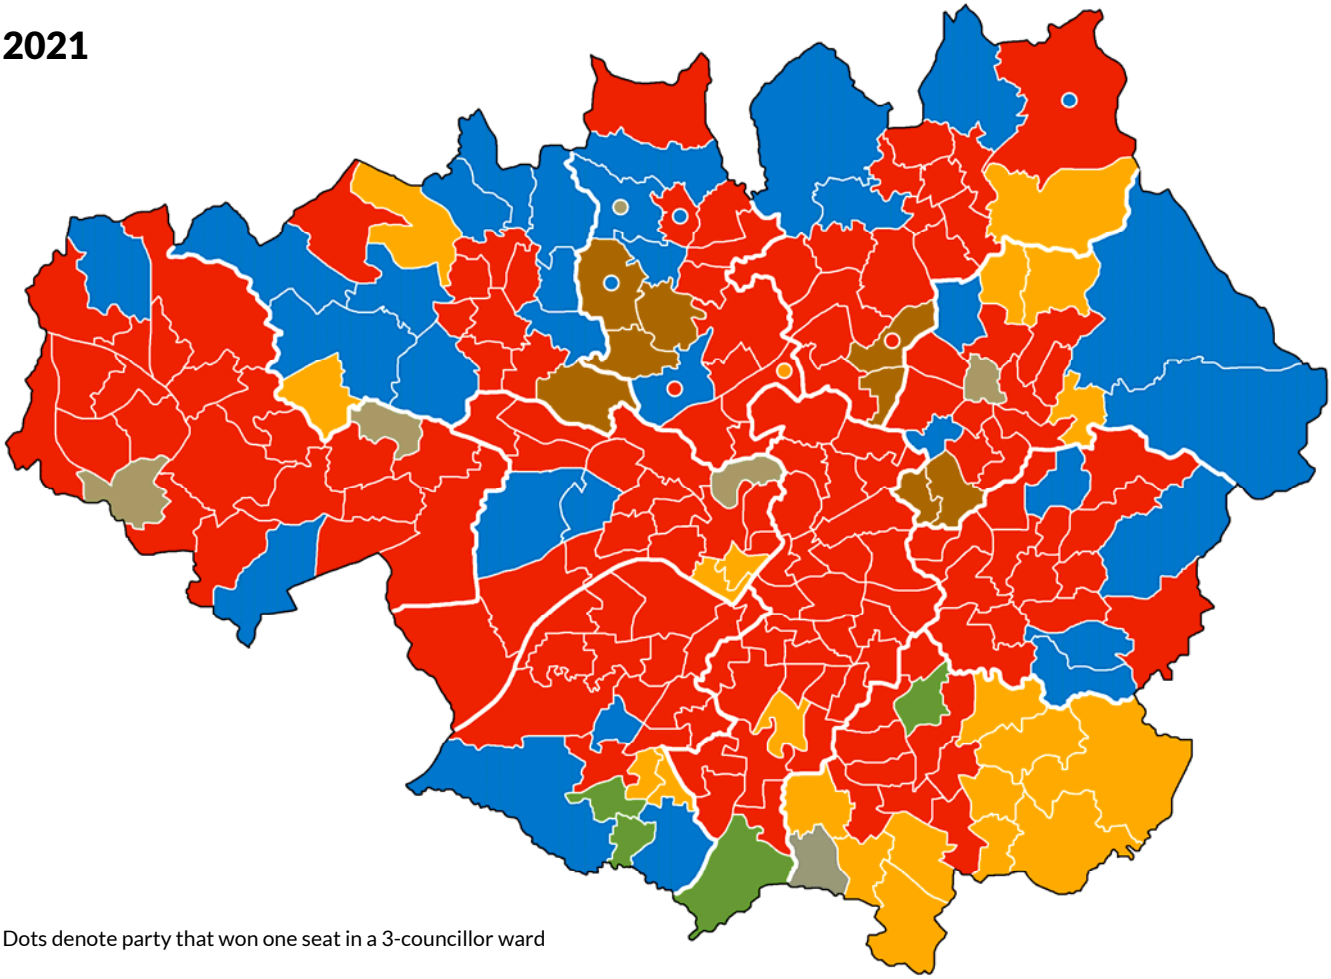

Labour remains bound within those areas that stayed loyal at the 2019 general election: London and Merseyside, parts of Greater Manchester, Tyneside and South and West Yorkshire - plus those smaller councils like Reading, Norwich and Ipswich that it has always been able to count on, even when it cannot always hold their parliamentary seats.

In the Metropolitan districts, Labour stabilised after some alarming losses. Not just the headline councils it has lost like Bolton, Dudley and Walsall, but Wirral and a suddenly relatively competitive Sunderland. The party officially lost its last seat in Solihull though its remaining councillors defected last year - one to the Tories, one to the Greens.

Labour faces a growing - albeit slowly growing - threat from the Green Party in the Mets, with Green advances the principal reason they lost control of Wirral two years ago. Greens are increasingly challenging in the exceptionally difficult terrain of Knowsley and St Helens, and they gained Labour seats in Birmingham, Bradford, Coventry, South Tyneside, Stockport, Manchester and Leeds. Importantly, the seats the Greens are taking in these councils are not seats the Conservatives can realistically expect to win: they are opening up a new front Labour has to defend, not fighting for the same territory, splitting the non-Labour vote and enabling Labour to hang on. Generally speaking, Green wards tend to have higher proportions of professionals and/or students and tend to be whiter and younger than average.

2021

In terms of votes, the winners in these elections were the Lib Dems who are inching back to competitiveness in English local elections, though still a pale imitation of the pre-coalition government party.

Councillors elected in Metropolitan Districts

Year	Con	Lab	LD	Others
2022	121	456	69	53
2021	170	419	59	49
2018	129	488	53	27
Change from 2021	-35	+15	+10	0
Change from 2018	- 8	-32	+16	+26

This is a like-for-like table so Birmingham, Doncaster, Liverpool and Rotherham are excluded. Where boundary changes occurred in any council included in this table the third placed candidate only is counted to replicate a one-third election. 2022 numbers are two seats different from 2021 and 2018 because St Helens has a different warding pattern following its boundary review this year.

Here's what I meant about the numbers of marginal wards clustered in England's smaller cities and larger towns. For the purposes of this table I've chosen twelve authorities covering such locations: Derby, Ipswich, Hull, Milton Keynes, Peterborough, Plymouth, Portsmouth, Reading, Southampton, Southend, Swindon and Worcester. With the exceptions of Reading and Ipswich, all of these are knife-edge councils and, with the exception of Hull, all are principally Labour-Conservative battlegrounds.

Between last year and this, the Conservatives and Labour essentially swapped places: the Conservatives crashing from 105 seats in 2021 to 49 this year, while Labour went from 64 to 107. And going back to 2018, things were closer but Labour was still comfortably ahead.

Councillors elected in smaller cities and large towns

Year	Con	Lab	LD	Others
2022	49	107	31	14
2021	105	64	26	11
2018	73	95	25	10
Change from 2021	-56	+43	+5	+3
Change from 2018	-24	+12	+6	+4

This boomerang of fortunes was a feature of the 2022 elections as can be seen on the selection of maps on the following pages, showing the electoral outcomes from the 2018, 2021 and 2022 elections.

The Liberal Democrats

In terms of votes, the winners in these elections were the Lib Dems who are inching back to competitiveness in English local elections, though still a pale imitation of the pre-coalition government party.

From 2002 to 2010 inclusive the Lib Dems NEV was never below 23%. This year's 17% was up two points on their 2021 NEV share. They are competitive in just two Metropolitan districts (Sheffield and Stockport) and have intense concentrations of strength in the wider country but little depth, the way they once did.

This remains a big problem for the self-anointed party of local government: the purveyors of pavement politics, who used their strength on councils to win dozens of constituencies in the 1997, 2001 and 2005 general elections. They are simply not that party today, which is one of the (several) reasons the Conservatives can be somewhat confident that there will not be a collapse of the so-called (largely imaginary) Blue Wall at the next election.

The Lib Dems are performing well in some parts of the South East, but only in specific places: there is no across the board gain for the party. There are (parts of) four counties in which the Lib Dems are performing strongly: Cambridgeshire, Oxfordshire, Hertfordshire and Surrey.

But it's important to separate out those areas where there seems to be a genuine Lib Dem advance (St Albans, Woking, South Cambridgeshire) and those where Lib Dem gains are part of a wider assault on the Conservatives as part of a local Conservative problem (Tandridge, Tunbridge Wells, arguably Wokingham - though here the Lib Dems are the principal beneficiaries). There is also Elmbridge in Surrey where the strength of residents association and amenity society candidates obscures relative party strengths - the Lib Dems clearly did better here than in 2021 but we really can't make authoritative claims beyond that.

The Lib Dems polled above 30% in nineteen English districts (plus three London boroughs), just three of which (Westmorland and Furness, Kingston upon Hull and Stockport) were beyond the south of England. This is hardly revelatory: Liberalism as a political force has always been strongest where Labour is weakest and that means the three southern regions. So to the extent that Liberal Democrats are most competitive in southern, otherwise Conservative-voting districts and constituencies there is a Blue Wall - if that is what you wish to call it. And this set of councils is also where we tend to find larger than average concentrations of university graduates and professionals - and therefore Remain voters who have been alienated from the Conservatives since the EU referendum in 2016.

But let's keep this in perspective. Not every Remainer has abandoned the Conservatives - for many there are far more consequential issues determining their vote. Those nineteen districts where the Lib Dems polled above 30% account for less than ten percent of the councils up this year. Some of these stronger Lib Dem areas cover constituencies the Lib Dems have no chance of winning (Three Rivers, Gosport, West Oxfordshire and Brentwood for example) while others are areas of long-standing Lib Dem strength in local government which they have struggled to convert on the national stage.

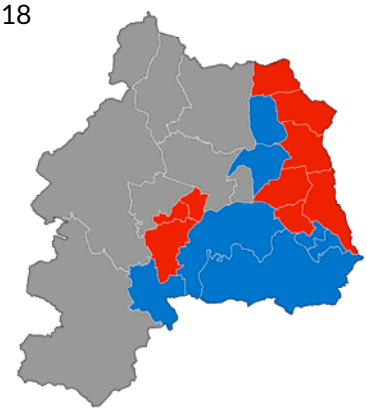

Before claiming that there is a Blue Wall, and that it is crumbling, consider how things looked for the Lib Dems (or Labour for that matter) after the 1996 local elections. Then there really was a southern Blue Wall that the Lib Dems succeeded in turning yellow.

Of course, the response to that is that nobody seriously believes that the next general election will replicate 1997. That is why notions of the "progressive alliance" and the "Blue Wall" matter in progressive circles: the next election will be about the Lib Dems picking off traditionally Conservative but Remain-supporting seats in the Home Counties and Labour taking enough of the "Red Wall" back to remove the Tory majority,

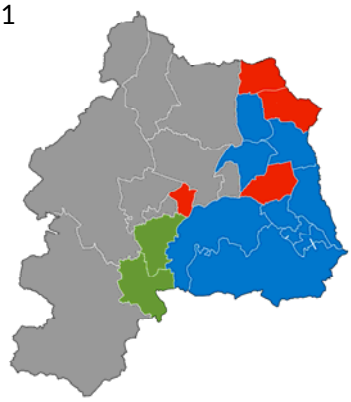

In truth we aren't truly going to be able to measure whether or not there is a Blue Wall, and what impact the Liberal Democrats are having on it until the 2023 local elections when several of the local authorities that are Lib Dem in that 1996 map are up for election. But unless things improve significantly on 2022 next year's map won't look much like the one above either.

The Green Party

As with the other parties, there were plusses and minuses from these elections for the Greens. Their growth continued, both in overall seats won and the number of councils on which they are now represented. But there were fewer of the spectacular gains on massive swings that were a feature of the 2021 council elections and there is still no evidence that voters' professed concern about climate change is translating into the sort of seismic electoral change the Green Party needs to become a significant player in UK politics.

This is not about the electoral system discriminating against them: in just eight local authorities did the Greens win a council-wide vote share of more than 20% (nowhere did they exceed 30%) with their 28.7% in Norwich the highest. Balance that against twelve authorities where the Greens fielded no candidates at all. In no local authorities beyond Brighton and Bristol - neither of which elected this year - are the Greens close to challenging for power, at least as anything other than as a minor player in a coalition.

Conclusions

The 2022 council elections were when the electorate turned against the boosterish bluster of the Johnson premiership. The Conservatives might have been able to save a considerable number of the seats they lost by acting decisively and removing Johnson as their leader before the council elections rather than waiting to sacrifice Barnet, Wandsworth and Westminster and the eleven councils they lost beyond London. Instead they needed the further impetus of dreadful by-election results in Tiverton and Honiton and Wakefield before being scared into acting, some very odd Conservative MPs claiming that Johnson was still an election winner in their area despite all evidence to the contrary (yes, I'm referring to you two Tory MPs in West Bromwich especially!)

And yet, the kicking the Conservatives received from the electorate beyond London was actually one shod in slippers rather than steel-capped work boots: on a par with the sort of mid-term local elections Mrs Thatcher sailed over throughout the 1980s. In those days, Professor Ivor Crewe of Essex University was the go-to naysayer damping Labour excitement by pointing out that the party's vote share and gains were nothing much to write home about. This is a similar event. Every major party failed to convince.

Labour's vote share in England beyond London was dismal: 36%. Yes, they regained a couple of councils they shouldn't really have lost control of: Crawley and Kirklees, won the newly created Cumberland council (but despite a decisive win in terms of seats were still less than five points ahead of the Conservatives in vote share), and gained for the first time Worthing where demographics have been creating a new marginal constituency in Worthing East and Shoreham.

Labour managed to poll most votes in a fairly long list of narrowly-held Conservative constituencies but, in most cases, not by very much given the mid-term nature of these elections. Labour is still struggling against demographic trends plus its own transformation into a party of affluent professional city-dwellers at odds with the values of much of the country beyond London, Merseyside and Manchester.

The Liberal Democrats improved, but are nowhere close to regenerating themselves into the electoral machine they once were. Nonetheless, they made progress in parts of the Remain-voting home counties and are still a far stronger party in much of the country than the Greens. Where the Lib Dems are strong the Greens seem unable to break through.

There is no sign of voters wishing for the Liberal Democrats to be replaced as the third party in English politics and, while anger at the Lib Dems' part in the 2010-2015 coalition government may have receded, it has not been replaced with renewed enthusiasm either. Despite their gains this year, both in local elections and parliamentary by-elections, I would describe them as becalmed. There are very few areas where people are inclined to vote Liberal Democrats and their assertion that they are threatening the so-called Blue Wall is not substantiated by results. Are progressive commentators desperate to see an end to a decade and more of Conservative government mistaking a mid-term protest vote for a tactical realignment mirage?

The electoral cycle next grinds around to the largest tranche of councils up for election each four years. Virtually every district council (other than those that elect by halves) is up for election.

This will provide some clarity on how England has realigned since Brexit happened at the end of 2019. The seats up next year are those that were last contested in the chaotic churn of May 2019 as Theresa May floundered around failing to get her atrocious Brexit deal through parliament. The Conservatives lost more than 2,000 seats in those elections, albeit from a very high watermark of 2015, elections which coincided with David Cameron's general election victory.

It may well be that some of the losses the Conservatives suffered back then, when Tory voters in true blue, leave-voting shire districts expressed dismay at the mess May concocted for herself and her country and who may be less un We will also get elections in red wall districts like Bolsover, Mansfield, Stockton and Bassetlaw which, along with another third of most Metropolitan Districts will show if Labour is recovering in these once-reliable areas. The two mainly rural Cheshire councils which are currently both hung but with minority Labour administrations will show whether Merseyside's expanding Labour influence continues to expand. The Tories will want Cheshire East, in particular, back.

White the Nottinghamshire districts of Mansfield, Ashfield and Bassetlaw are moving away from Labour, Broxtowe and Rushcliffe are moving towards them. They should expect to take Broxtowe and perhaps remove the Conservative majority in Rushcliffe.

A similar pattern is happening in Derbyshire: Labour may lose seats in Chesterfield and North East Derbyshire, but may well be able to gain High Peak and make (limited) inroads in Derbyshire Dales - and perhaps South Derbyshire as well.

Labour may actually find it easier to make progress further south. Can they win majorities in Dover, Dartford, Medway or Thanet, for example. Jacob Rees Mogg represents half of North East Somerset which has some Labour history - the area now has a Labour regional mayor who used to represent much of the same area in parliament. Next door South Gloucestershire should, at the very least, fall to no overall control if Labour is making inroads in middle England.

In the south, councils like Surrey Heath, Waverley, Lewes, Horsham, West Berkshire, Dacorum, New Forest and East Hampshire will demonstrate whether there really is a material Liberal Democrat threat to the Conservatives in their strongholds: we need more evidence than the sparse annually-electing councils of Surrey, Hertfordshire and Oxfordshire.

This will also be a test of how prevalent the Remain-Leave divide exposed, but not created, by the 2016 EU referendum. The vast majority of the districts electing next year voted Leave - in many cases decisively, and they cannot be sorted into Labour Remain areas and Conservative Leave districts. In a bygone era Labour might have fancied their chances at councils like Great Yarmouth, Boston, North Lincolnshire (Scunthorpe) and maybe even Tendring (Clacton and Harwich). Stoke would have been easily retained. It'd be a considerable surprise if these hugely Leave-voting districts touch Labour with a barge pole in 2023; but it's entirely possible that the party could win a majority in affluent, university-centred Warwick and remove the Conservatives from power in Canterbury (a district far larger than the cathedral city itself)?

Finally, the May 2023 elections will be the first electoral test of the Liz Truss premiership. Will the removal of the toxic Johnson and the Conservative response to the cost of living crisis - energy price freezes and tax cuts - be rewarded, or has the public permanently tired of this long-lasting Tory government? Will the somewhat misogynistic criticism of Truss's ability and intellect be reflected in votes cast, or will voters gradually warm to a calmer, more direct and dialogically coherent Prime Minister? 2023 will show if we are running down the clock on the latest Conservative era or, instead, whether an historic fifth term looks a realistic prospect in the months ahead.

St Neots Eatons, Huntingdonshire - 2 seats (Res to Con)

*** Gains and losses for Cumberland council are benchmarked against the 2017 Cumbria County Council elections, which were on the same boundaries. Other councils that were created this year, or which had radical boundary changes that make direct like-for-like comparisons difficult, are not included in these change figures.**

Control of councils 2022

Councils in bolder colours are those that held elections this year; in lighter colours those not up for election this year. Grey denotes no overall control. Croydon is coloured blue because the Conservatives hold the mayoralty: the council itself is under no overall control.

Overview of the 2022 results: seats won

	Con	Lab	LD	Grn	Ind	Others
Adur	7 (16)	5 (9)		1 (2)	1 (2)	
Amber Valley	9 (31)	4 (12)		2 (3)

Royston

Barnsley Central — swing incalculable

Dave Webster	**Lab**	**534**	**53.4**	**- 15.7**
Neil Fisher	Ind	246	24.6	
Macaulay Larkin	Con	167	16.7	+ 4.9
Jonathan P. Hood	LD	53	5.3	

Following the count, Barnsley Council acknowledged it had omitted to count a ballot box of postal votes cast in Royston ward. Election law asserts that once a result has been declared it can only be amended by order of the High Court. The result including the postal ballots that weren't counted did not alter the winner. The figures including the omitted box of postal votes were:

Dave Webster	**Lab**	**1,085**	**53.2**	**- 15.9**
Neil Fisher	Ind	458	22.5	
Macaulay Larkin	Con	363	17.8	+ 6.0
Jonathan P. Hood	LD	132	6.5
